# #41 Swivel Ring Hanger

Finish: Pre-Galvanized with Zinc Plated insert nut

Material: Carbon Steel  
Stainless Steel (#41 304SS) and (#41 316SS): 1/2" - 4" Only

Approvals: ULC, UL and FM and complies with  
MSS SP-58 & SP-69 (Type 10)  
(Note: approvals do not apply to Stainless)

Recommended: for the suspension of non-insulated stationary  
pipe lines allowing for vertical adjustment

\* fitted with pipe spacer on cross bolt.

Oversized Clevis Hanger Installations:

Note: A pipe spacer should be placed over the clevis bolt and blocks need to be placed on either side of the pipe until final installation is completed. Additionally all clevis hangers on the line need to take up their share of the pipe load prior to insulating to prevent hanger damage by overloading.

QWI 4.3.1 Issue Date Oct/17 Rev.17

# #24L Clevis Hanger Extended

**Finishes:** Bare Metal, Zinc Plated, Hot Dipped Galvanized, Epoxy

**Materials:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 1).

**Recommended:** Recommended for the suspension of insulated, stationary pipe lines allowing for vertical adjustment.

'B'  
Rod Take-Out  
Pipe center to bottom of hanger rod.  
'C'  
Pipe center to top of hanger.  
'D'

# #27AC Adjustable Clevis Hanger - Oversized

**Finishes:** Bare Metal, Zinc Plated

**Materials:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 1).

**Recommended:** Recommended for the suspension of stationary ductile iron or cast iron pipe

Maximum temperatures: Bare Metal 650°F, Galvanized 450°F

**Note:** For sizes 12" and larger, a spacer is added over cross bolt.  
For use with:

AWWA Cast iron Pipe  
Ductile Iron Pipe  
Asbestos Cement / Transite Pipe

# RUBBER IN SHEAR HANGER

## (NHD Series Double Deflection)

**NHD** Series Hangers are neoprene elements housed in sturdy steel brackets. The element includes top and bottom steel plates for uniform load distribution. All elements are color coded for easy identification. The element incorporates a projected collar to prevent metal to metal contact between the rod and bracket. The NHD series hangers are used for hanging machines such as fan coil units, fans etc.

### NOTES:

- Bracket: Blue Powder Coated
- Hanger Rods and Nuts not included
- DO NOT exceed maximum load by more than 5.0 %
- Model dimensions and details listed on next page

### FEATURES:

- Steel Plates are embedded in the element for uniform loading
- Element is oil and water resistant

HANGER MODEL	MAX LOAD (LBS)	DEFLECTION (INCHES)	HANGER DIMENSIONS (INCHES)					COLOR
			A	B	C	D	E	
NHD-1-A	30	0.4	3	1-3/8	2	2-1/4	3/8	BLUE

# SPRING HANGERS

## (SH- Series 3/4" Deflection)

SH series spring hangers are steel springs housed in rectangular steel brackets. The assembly incorporates dual (Steel and Elastomer) washers for uniform load distribution and high frequency isolation. These spring hangers are normally used in critical areas where noise and vibration need to be controlled.

### NOTES:

- Bracket: Blue Powder Coated
- Spring: Hot Dip Galvanized
- Design allows angular hanger misalignment
- Hanger Rods and Nuts not included

### APPLICATIONS:

- Fan Coil Units
- Air Handling Units
- Fans
- Pipes
- Ducts

ISOLATOR MODEL	RATED LOAD (LBS)	RATED DEFLECTION (INCH)	COLOR	
			MAIN	STRIPE
SH-011	30	0.75	SILVER	BLUE
SH-012	66	0.75	SILVER	RED
SH-013	105	0.75	SILVER	YELLOW
SH-014	150	0.75	SILVER	WHITE
SH-015	225	0.75	SILVER	BLACK

# SPRING HANGERS

## (SHA Series $\frac{3}{4}$ " Deflection)

SHA series spring hangers are steel springs housed in rectangular steel brackets. The assembly incorporates dual (Steel and Elastomer) washers for uniform load distribution and high frequency isolation. These spring hangers are normally used in critical areas where noise and vibration need to be controlled.

### NOTES:

- Bracket: Powder Coated
- Spring: Hot Dip Galvanized
- Design allows angular hanger misalignment
- Hanger Rods and Nuts not included

### APPLICATIONS:

- Fan Coil Units
- Air Handling Units
- Fans
- Pipes
- Ducts

ISOLATOR MODEL	RATED LOAD (LBS)	RATED DEFLECTION (INCH)	COLOR	
			MAIN	STRIPE
SHA-011	30	0.75	SILVER	BLUE
SHA-012	66	0.75	SILVER	RED
SHA-013	105	0.75	SILVER	YELLOW
SHA-014	150	0.75	SILVER	WHITE
SHA-015	225	0.75	SILVER	BLACK

# SPRING HANGERS

## (SHB- 100 Series 1" Deflection)

SHB series spring hangers are large diameter steel springs housed in rectangular steel brackets. The assembly incorporates dual (Steel and Elastomer) washers for uniform load distribution and high frequency isolation. These spring hangers are normally used in critical areas where noise and vibration need to be controlled.

X = 46° For Spring 101 to 107

### NOTES:

- Bracket: Blue Powder Coated
- Spring: Hot Dip Galvanized
- Design allows angular hanger misalignment
- Hanger Rods and Nuts not included

### APPLICATIONS:

- Fan Coil Units
- Air Handling Units
- Fans
- Pipes
- Ducts

# SPRING HANGERS

## (SHD- 100 Series 1" Deflection)

SHD series spring hangers are large diameter steel springs housed in rectangular steel brackets. The assembly incorporates dual (Steel and Elastomer) washers for uniform load distribution and high frequency isolation. These spring hangers are normally used in critical areas where noise and vibration need to be controlled.

### NOTES:

- Bracket: Blue Powder Coated
- Spring: Hot Dip Galvanized
- Bottom Cup: Neoprene
- Design allows angular hanger misalignment
- Hanger Rods and Nuts not included

### APPLICATIONS:

- Fan Coil Units
- Air Handling Units
- Fans
- Pipes
- Ducts

ISOLATOR MODEL	RATED LOAD (LBS)	RATED DEFLECTION (INCH)	COLOR	
			MAIN	STRIPE
SHD-101	60	1.3	SILVER	BLUE
SHD-102	100	1.3	SILVER	ORANGE
SHD-103	165	1.2	SILVER	BROWN
SHD-104	260	1.0	SILVER	BLACK
SHD-105	370	0.8	SILVER	YELLOW
SHD-106	450	0.5	SILVER	RED
SHD-107	700	0.45	SILVER	GREEN

### SPRING CUSHION HANGER #178

- Spring Size 1 through 3
- Carbon Steel
- Consists of a set of two springs and four retaining plates only.
- **Note:** Order hangers separately.
- Used where piping is subject to negligible vertical movement but where a protective cushioning action is required.  
When used with Fig. 95 Roller Hanger as illustrated, an excellent flexible support is provided for horizontal steam or hot water
- Specify spring size, Dimension "A", figure number and name.

SPRING SIZE	SPECIFICATION DATA			Max. Pipe Load LB	Deflection Rate LB/IN	Max Spring Deflection (IN) From Free Height	Approx. Wt Per 100
	A	B Unloaded	C				
1	3/8	6 3/4	3 1/2	535	428	1 1/4	450
2	1/2	6 1/4	4 1/2	1500	1200	1 1/4	1400
3	7/8	9 3/8	4 1/2	3000	2400	1 1/4	2200

Loads and deflections are per set (two springs)

**ONE HOLE PIPE STRAP #44**

- 1/4" through 2"
- Carbon Steel
- Pre-Galvanized Zinc
- Recommended for the support of light duty conduit on walls or sides of beams. Not recommended for supporting pipe on ceilings or similar horizontal surfaces.
- Specify pipe size, figure number, name and finish.
- Also available in Stainless Steel and O.D. Sizes

## 2-HOLE PIPE STRAP #45

- 1/2" through 6"
- Carbon Steel
- Pre-Galvanized
- Complies with MSS SP-58 and SP-69 (Type 26).
- Recommended for the support of light duty conduit on walls or sides of beams. Not recommended for supporting pipe on ceilings or similar horizontal surfaces.
- Specify pipe size, figure number, name and finish.
- Also available in Hot Dipped Galvanized

## #45 SS TWO HOLE PIPE STRAP

**Material:** 304 Stainless Steel  
alt: 316 Stainless Steel

**Finish:** N/A

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 26).

**Recommended:** to support light duty pipe or tubing to walls or sides of beams

**Notes:** Not recommended for hanging from ceilings

Pipe Size	Pipe OD	A	B	C	Material
<b>1/4</b>	.540	3/16	2 1/16	1 7/16	20 ga x 5/8

## #46 HOLD DOWN CLAMP

**Finish:** Bare Metal

*alt: Zinc Plated, Hot Dipped Galvanized*

**Material:** Carbon Steel

*alt: Stainless Steel 304 and 316*

**Approvals:** Complies with MSS SP-58  
and SP-69 (Type 26).

**Recommended:** Designed to steady a horizontal run  
of pipe against a perpendicular  
section of strut channel or any  
other flat surface

**Notes:**

Iron Pipe Size	SPECIFICATION DATA			Weight Each (Lbs)

**VAN HANGER**  
**Epoxy Coated Copper-Gard #129**

- 1/2" through 2"
- Carbon Steel
- Epoxy Coated Copper-Gard c/w Yellow Zinc Dichromate Screw
- Designed to support copper tubing to wall. Supports the pipe 1" from the back of pipe to wall. The wood screw is concealed upon installation.
- Specify tube size, figure number and name.

## 2-BOLT PIPE CLAMP #31Z

- 1/2" through 36"
- Carbon Steel
- Electro-Plated Zinc
- Complies with MSS SP-58 and SP-69 (Type 4).
- Recommended for the suspension of non-insulated, pipe lines.
- Specify pipe size, figure number, name and finish.
- Also available in Bare, Hot Dipped Galvanized, and Stainless Steel

### Installation Note:

The B and C dimensions shown are approximate. When using a riser clamp in any application other than what it is designed for (i.e., supporting a riser pipe between floors of a building) confirm against the product in hand the hole centers and overall length if they are critical to your installation.

# #31H 2-Bolt Pipe Clamp Heavy

**Finishes:** Bare Metal, Zinc Plated, Hot Dipped Galvanized

**Materials:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 4).

**Recommended:** Recommended for suspension of heavy loads where little or no insulation is required.

Maximum temperatures: Bare Metal 750°F, Galvanized 450°F

3-BOLT PIPE CLAMP #33M

1/2" through 36"  
 Carbon Steel  
 Bare Metal  
 Complies with MSS SP-58 and SP-69 (Type 3).  
 For the suspension of insulated pipe lines normally used with weldless eye nut Fig. 64  
 Specify pipe size, figure number, name and finish.  
 Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized

### ALLOY 3-BOLT PIPE CLAMP #33A

- 1 1/2" through 24"
- Chrome Molybdenum Steel (ASTM A 387 Grade 22)
- Complies with MSS SP-58 and SP-69 (Type 3).
- Recommended for suspension of high temperature pipe requiring insulation.
- Maximum Temperature: 1,050°F
- Specify pipe size, figure number, name and finish.
- Note:** Galvanizing is not recommended for alloy products.

## UNDERGROUND BELL CLAMP #35

- 3" through 24"
- Carbon Steel Clamp, Cast Iron Washer
- Bare Metal
- Recommended as a safety device to be use on underground AWWA ductile iron pipe. This added reinforcement is necessary in any case of reversal, stoppage, or change in direction of flow.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc

# #33H 3-Bolt Pipe Clamp Heavy

**Finishes:** Bare Metal, Zinc Plated, Hot Dipped Galvanized

**Materials:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 3).

**Recommended:** Recommended for supporting pipe up to 4" of insulation.

Maximum temperatures: Bare Metal 750°F, Galvanized 450°F

# BISMAT® 5000 Rubber Lined Clamp

**Finishes:** Zinc Plated, Rubber Lined

**Materials:** Carbon Steel / EPDM Rubber

**Approvals:** Complies with MSS SP-58 & SP-69 (Type 12).

**Recommended:** for use with PEX, CPVC and PVC pipe

**Notes:** Green rubber lining formulated without plasticizers  
 Easy open/close locking system  
 Inner lining is smooth to allow for expansion and contraction  
 Patented spacer washers allow for sliding or fixed hanger positions  
 Temperature rating -40°F to 200°F  
 ASTM E-84 plenum rated  
 Easy-Close mechanism in this versatile EPDM rubber lined clamp. Saves installation time and effort, prevents vibration, noise, and metal to metal contact.

15mm to 60-65mm

63mm and above

## #40 SPLIT RING HANGER

**Finish:** Zinc Plated, Rubber Lined

**Material:** Carbon Steel / EPDM Rubber

**Approvals:** MSS SP-58 (Type 12)

**Recommended:** for the suspension of insulated and non-insulated pipe lines.

**Notes:** UV resistant rubber lining provides for noise reduction and vibration control.  
Temperature range use -20F to +230F  
Swing gate style clamp for quick and easy installation (no loose hardware).

## MANHOLE DROP PIPE CLAMP

**FIG#47** - For SDR 35 Pipe

**FIG#48** - For DIP(C-900) Pipe

**FIG#49** - For IPS Schedule 40 Pipe

- 4" through 12"
- Stainless Steel Type 304
- Designed for easy installation and support of manhole drop pipe.
- Specify size, figure number, and name.

**starQuick® SELF-LOCKING PIPE CLAMP**

1/4" - 2" Copper Tube and Iron Pipe

UV-stabilized Polymer

Bare Metal

Time and cost saving solution for pipe fixing  
due to self-locking attribute.

ASTM E-84 - plenum rated, UL Listed

Temperature resistance -40°F to 200°F

Specify part number, pipe size, and name.

**Product Specification**

**starQuick® System**

**25/50 Plenum Rated**

**starQuick® Clamp + starQuick® Universal Rail Adaptor**

**Specification:**

The starQuick® System is a flame and smoke rated clamp compatible for use with Copper, Iron Pipe, PEX, CPVC, PVC, Conduit, Wire, Cable and more. Supports 1/4" CTS up to 2" IPS tubing sizes. When paired with the Universal Rail Adaptor, starQuick® Clamps mount easily to Strut or BIS RapidRail® C-profile. Material meets ASTM E-84 25/50 Flame/Smoke rating.

**Product Information:**

- Material: PA-6 Nylon - Grey
- Temperature range: -40° F to 200° F (constant), 260° F (peak)
- Load rating: see Chart
- Meets ASTM E-84 25/50 plenum rating
- UV Stabilized
- UL, UPC / IAPMO listed

**starQuick® Clamp (085 4 0XX)**

**starQuick® Universal Rail Adaptor (085 4 332)**

# #82Z Riser Clamp

Finish: Bare Metal, Zinc Plated, HDG  
**for 304SS and 316SS**  
*see separate specification sheet*

Material: Carbon Steel  
 Bare Metal (#82)

Approvals: Complies with MSS SP-58 and SP-69 (Type 8).  
 cUL Approved (2" through 8")

Recommended: For the support and stabilizing of vertical pipe runs.

## Installation Note:

The A and B dimensions shown are approximate. When using a riser clamp in any application other than what it is designed for (i.e., supporting a riser pipe between floors of a building) confirm against the product in hand the hole centers and overall length if they are critical to your installation.

## HEAVY DUTY RISER CLAMP #82H

- 2" through 24"
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 42).
- Recommended for the support and stabilizing of vertical pipe runs.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized
- Shear lugs included.

## RISER CLAMP

### Epoxy Coated Copper-Gard #85

- 1/2" through 6"
- Carbon Steel
- Epoxy Coated Copper-Gard c/w Zinc Hardware
- Complies with MSS SP-58 and SP-69 (Type 8).
- Recommended for the support and stabilizing of vertical copper tubing pipe runs.
- Specify pipe size, figure number and name.

#### Installation Note:

The A and B dimensions shown are approximate. When using a riser clamp in any application other than what it is designed for (i.e.. supporting a riser pipe between floors of a building) confirm against the product in hand the hole centers and overall length if they are critical to your installation.

### OFFSET PIPE CLAMP #87

- 3/4" through 12"
- Carbon Steel
- Bare Metal
- Designed to support general piping, running from wall or floor. This clamp can be furnished with "L" dimensions to suit field conditions.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, Epoxy, and Hot Dipped Galvanized

## EXTENDED PIPE CLAMP #88

- 3/4" through 8"
- Carbon Steel
- Bare Metal
- Designed for direct welding of hanger to steel structure
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, Epoxy, and Hot Dipped Galvanized

PIPE SIZE	SPECIFICATION DATA				APP'X WT. PER 100 (LBS)

### ADJUSTABLE ROD BEAM CLAMP #159

- 3/8" through 5/8" rod size
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and MSS SP-69 (Type 27)
- Designed to be used in the suspension of a hanger rod from an I beam. Recommended for flange widths from 4" minimum to 8" maximum.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc

ROD SIZE A	MATERIAL	FLANGE WIDTH		B	E	F	L	WEIGHT EACH (LBS)	MAX. REC. LOAD (LBS)
		MIN	MAX						
3/8 - 16	3 Ga x 1 1/4	3 1/2	8	2	3/8	1	2 3/4	0.98	300
1/2 - 13	3 Ga x 1 1/2	3 1/2	8	2	1/2	15/16	2 3/4	1.38	700
5/8 - 11	3 Ga x 1 3/4	3 1/2	8	2	5/8	7/8	2 3/4	1.86	1000

QWI 4.3.1 Issue Date Novv/13 Rev.2

*Note: when referencing a printed copy of this specification page please insure it is the latest version as found on our website at [www.taylorassociates.com](http://www.taylorassociates.com)*

# #201 Stamped "C" Clamp

**Finish:** Bare Metal, Zinc Plated

**Material:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 23)  
 (3/8" and 1/2") cUL, FM for 4" I.P. Max (Mild Steel Only)  
 (3/8" and 1/2") cUL, for 4" I.P. Max (Stainless Steel)

**Recommended:** Designed for fastening to beam flange where thickness does not exceed 0.75 inches.

**Note:** Stainless Steel Only Available up to 3/4"

**MALLEABLE "C" CLAMP #301**

- 3/8" through 3/4"
- Malleable Iron\* c/w hardened steel cup point set screw
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 23).
- (3/8" and 1/2") CUL, FM for 4" I.P. Max.
- Recommended for attachment to American Standard I-Beams and wide flange beams where thickness does not exceed 3/4"
- Specify size, figure number, name and finish.
- Also available in Electro-Plated Zinc

Maximum recommended set screw torque values per MSS SP-69.

Set Screw Size 3/8"-16  
Foot-Lbs 5  
Nm 7

(CARE SHOULD BE TAKEN NOT TO OVER TIGHTEN SET SCREW)

# #404 Purlin Clamp

**Finish:** Bare Metal, Zinc Plated

**Material:** Malleable Iron\* c/w hardened steel cup point set screw

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 23)

**Recommended:** Designed for use with large-lip rolled steel purlins to eliminate the need to modify steel purlin for standard C-Clamp

Maximum recommended set screw torque values per MSS SP-69.

Set Screw Size 3/8"-16  
 Foot-Lbs 5  
 Nm 7

(CARE SHOULD BE TAKEN NOT TO OVER TIGHTEN SET SCREW)

### INSULATOR SUPPORT #405

- 1/4" through 3/8"
- Malleable Iron
- Electro-Plated Zinc
- Designed to attach hanger rod to beam or framework where thickness does not exceed 1/2 inch. Rod tap on both bottom and back of clamp.
- Specify rod size, figure number, name and finish.
- Also available in Stainless Steel

(CARE SHOULD BE TAKEN NOT TO OVER TIGHTEN SET SCREW)

# #406 Small Mouth Top Beam Clamp

**Finish:** Bare Metal, Zinc Plated

**Material:** Malleable Iron\* c/w hardened steel cup point set screw  
Stainless Steel 304SS & 316SS

**Approvals:** U.L. - U.L.C. listed 3/8 and 1/2 (1/2 for 4" IPS max).  
**FM approved for 3/8" only.**  
Complies with Manufacturers' Standardization Society  
MSS SP-58 and SP-69 (Type 19)

**Recommended:** Recommended for use under roof installations with  
bar joist type construction where flange thickness does  
not exceed 5/8 inch.

**Note:** Stainless Steel Only Available up to 3/4"

Maximum recommended set screw torque values per

MSS SP-69.

Set Screw Size 3/8"-16

**MALLEABLE BEAM CLAMP #410**  
(order extension piece seperately Fig# 411)

- Flange Width of 2 3/8" through 7"
- Malleable Iron Jaw, Carbon Steel Hardware
- Bare Metal
- Complies with MSS SP-58 and MSS SP-69 (Type 30) when used with Extension Piece Fig# 411
- Designed for attaching a hanger rod to the bottom flange of a beam. Flange thickness not to exceed 0.60"
- Specify figure number, name and finish.
- Also available in Electro-Plated Zinc

A (7/8 MAX ROD)	SPECIFICATION DATA						BOLT DIA.	RECOM. MAX. LOAD (LBS.)	APP'X WT PER 100 (LBS.)

**BEAM CLAMP #425**

(order Fig# 64 Weldless Eye Nut separately)

4" through 12" Flange Width

Carbon Steel

Bare Metal

Complies with MSS SP-58 and MSS SP-69 (Type 21).

Designed for attaching a hanger rod centered under beam flanges.

Specify clamp size, flange width &amp; thickness, figure number, and finish.

Also available in Electro-Plated Zinc, and Stainless Steel

**Note:** Determine the clamp size by the load to be carried on each clamp.

**HEAVY BEAM CLAMP #450**

(order Fig# 64 Weldless Eye Nut separately)

- 3" through 16" Flange Width
- ASTM A-36 carbon steel.
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 28 without links, Type 29 with links.)
- Designed for suspension of heavy loads from beams up to 16" wide and up to 1" thick.
- Specify clamp size, figure number, rod size and finish.
- Also available in Electro-Plated Zinc

Without Links  
Sizes 1, 3, and 5With Links

**STRUCTURAL WELDING LUG #55 Short**  
**STRUCTURAL WELDING LUG #55L Long**

- 1/2" through 3 3/4" rod size
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 57).
- Designed to be welded to structural members and used in conjunction with Figure #63 forged steel clevis with pin and cotters.
- Specify rod size, figure number, name, finish, and whether long or short lug is required.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized

# #66 Welded Beam Attachment

## #67 Welded Beam Attachment Without Hardware

**Finishes:** Bare Metal, Zinc Plated, Hot Dipped Galvanized

**Materials:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS SP-58 and SP-69 (Type 22).

**Recommended:** For attachment to bottom of beams where heavier loads are being supported

Maximum temperatures: Bare Metal 750°F, Galvanized 450°F

**Note:** #67 available up to 1 3/4"

2" Rod Dia. and Larger are Fabricated.

1 3/4" Rod Dia. and Smaller are Formed using Bolt or Pin.

**CONCRETE INSERT #81**  
**CONCRETE INSERT NUT #81N**

- Carbon Steel
- Bare, Electro-Plated Zinc, Painted
- Heavy gauge insert box is nailed to concrete form. When concrete has set, knock out plug can be removed and insert nut installed. Side openings accommodate up to 1/2" reinforcing rods.
- Complies with MSS SP-58 and MSS SP-69 (Type 18).
- Specify figure number, name, and finish.
- For Insert Nut #81N specify figure number, name, finish, and rod size.

# 81N Insert Nut

SIZE A	WEIGHT EACH (Lbs.)		MAX. REC. LOAD (Lbs.)

### SIDE BEAM BRACKET #120

- 3/8" through 3/4" rod size
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 34).
- Designed to be fastened to side of joist in order to support a hanger rod.
- Specify rod size, figure number, name and finish
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized

SIZE	SPECIFICATION DATA			MATERIAL	RECOM. MAX. LOAD (LBS)	APP'X WT. PER 100 (LBS)	PC'S PER PKG.

**CONCRETE CLEVIS PLATE #166**

(Complete with bolt and nut)

- 3/8" through 1 3/4" Rod
- Carbon Steel
- Bare Metal
- Structural attachment to concrete ceiling where flexibility is desired.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc

## 20° SWIVEL ROD EXTENSION #17W

- 3/8"
- Carbon Steel
- Electro-Zinc Plated
- The extension piece, when installed in the hanger assembly, allows for movement up to 20°. Threading at both ends is 3/8"-16 for use with standard threaded rod or hardware. Height adjustable with an inspection hole in collar to check the screw in depth of the threaded rod. Assemblies will hang "plumb" from the pivot point or, where movement is required, the hanging assembly will accommodate.
- Specify size, figure number, and name.

SIZE	BOX QTY.	APPROX. WT. Per 100 PCS	MAX LOAD

### ALL THREADED ROD #54

- 3/8"-16 x 10' through 1 1/2"-6 x 10'
- \*Mild Steel - Grade 2
- Zinc Plated
- Used in attaching hangers to structural attachments.
- Specify thread size, length, figure number, name and finish.
- Also available in Bare, Stainless Steel, and Hot Dipped Galvanized

\* Base material is C1008-C1020, conforming to the requirements of ASTM A307 Grade A spec, class 2 thread.

**ROD COUPLING #62  
with Sight Hole #62S**

- 3/8" through 1 1/2" rod
- Carbon Steel
- Electro-plated zinc
- Designed for coupling two hanger rods of equal rod size
- Specify rod size, figure number and name.
- Also available in Stainless Steel, Hot Dipped Galvanized, Bare Metal

ROD SIZE	SPECIFICATION DATA		RECOM. MAX. LOAD (LBS)	APP'X WT. PER 100 (LBS)	PC'S PER PKG.

## FORGED STEEL CLEVIS #63

- 3/8" through 4" rod size
- Forged Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 14).
- Designed for use on high temperature piping installations
- Specify figure number, name, size, pin size.
- Also available in Hot Dipped Galvanized, and Stainless Steel

SIZE A	CLEVIS SIZE NO.	SPECIFICATION DATA							WGT. EACH (LBS)	MAX REC LOAD (LBS)

## WELDLESS EYE NUT #64

- 3/8" through 2 1/2" rod size
- Forged Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 17).
- Designed for use on high temperature piping applications.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Hot Dipped Galvanized, and Stainless Steel

### WARNING

RATED CAPACITY IS DRAMATICALLY REDUCED WHEN LOADED AT ANY ANGLE. LOADING MUST NEVER BE MADE AT AN ANGLE GREATER THAN 45° FROM BOLT CENTERLINE.

## EYE SOCKET #65

- 1/4" through 7/8" rod size
- Malleable Iron
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 16).
- A non-adjustable threaded rod attachment often used with the split ring hanger Fig. # 38R
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc

ROD SIZE A	SPECIFICATION DATA			RECOM. MAX. LOAD (LBS)	APP'X WT. PER 100 (LBS)	PIECES PER PACKAGE

**TURNBUCKLE #68**

- 3/8" through 2 1/2" rod size
- Forged Steel
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 13).
- Designed as an adjustable hanger rod connection.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized
- Tapped right hand and left hand thread.
- Larger rod size available upon request.
- Different openings available upon request.

### TURNBUCKLE ADJUSTER #114

- 3/8" through 1/2"
- Malleable Iron
- Bare Metal, copper plated.
- Designed to provide vertical rod adjustment with split ring hanger.
- Complies with MSS SP-58 and SP-69 (Type 15).
- Specify rod size, name, finish

ROD SIZE A	PIPE SIZE	SPECIFICATION DATA			MAX. REC. LOAD (Lbs.)	WEIGHT EACH (LBS)

### EXTENSION PIECE #411

- 3/8" through 7/8" rod size
- Malleable Iron
- Bare Metal
- Designed for attaching a hanger rod to various building attachments.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc

**PIPE COVERING PROTECTION SHIELD #69**

- Sizes 0 through 30 (see table below)
- Pre-Galvanized Carbon Steel
- Designed for outside of foam or fiberglass insulation on stationary pipe lines to prevent crushing of insulation without breaking the vapor barrier.
- Specify shield size, figure number, name and finish
- Also available in Stainless Steel, and Hot Dipped Galvanized

## HEAVY DUTY PIPE COVERING PROTECTION SHIELD #69H

- Sizes 0 through 30 (see table below)
- Pre-Galvanized Carbon Steel
- Designed for outside of foam or fiberglass insulation on stationary pipe lines to prevent crushing of insulation without breaking the vapor barrier.
- Complies with MSS SP-58 and SP-69 (Type 40)
- Specify shield size, figure number, name and finish
- Also available in Stainless Steel, and Hot Dipped Galvanized

**TAYLOR**  
PIPE SUPPORTS

QWI 4.3.1 Issue Date Mar/12 Rev.6

Note: when referencing a printed copy of this specification page please insure it is the latest version as found on our website at [www.taylorassociates.com](http://www.taylorassociates.com)

### PIPE COVERING PROTECTION SADDLE #70 (1" Insulation)

- 3/4" through 14"
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and MSS SP-69 (Type 39).
- Designed to protect pipe insulation from crushing, typically used on high temperature pipe lines.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized
  
- All saddles 12" in length.**
- Center rib starts at 12" IP**

### PIPE COVERING PROTECTION SADDLE #71 (1 1/2" Insulation)

- 3/4" through 20"
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and MSS SP-69 (Type 39).
- Designed to protect pipe insulation from crushing, typically used on high temperature pipe lines.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized
  
- All saddles 12" in length.**
- Center rib starts at 12" IP**

## PIPE COVERING PROTECTION SADDLE #72 (2" Insulation)

- 3/4" through 20"
- Carbon Steel
- Bare Metal
- Complies with MSS SP-58 and MSS SP-69 (Type 39).
- Designed to protect pipe insulation from crushing, typically used on high temperature pipe lines.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel, and Hot Dipped Galvanized

- All saddles 12" in length.
- Center rib starts at 12" IP

**PIPE SADDLE SUPPORT #520  
c/w SOLID STEM**

- 2" through 12"
- Carbon Steel
- Bare Metal
- Complies with Manufacturers' Standardization Society  
MSS SP-58 and SP-69 (Type 36)
- Designed for use on horizontal or gently sloping pipe  
lines running close to floor. Stem is solid rod  
designed to be inserted into vertical standing pipe.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Hot Dipped Galvanized

IRON PIPE SIZE	SPECIFICATION DATA		DIAMETER AND LENGTH OF STEM	APP'X WT. PER 100 (LBS.)
	MATERIAL			
2	3/8 x 1 1/2		7/8 x 6	157

### ADJUSTABLE PIPE SADDLE SUPPORT WITH THREADED COUPLING #521

- 2" through 12"
- Carbon Steel
- Bare Metal
- Designed for use on horizontal or gently sloping pipe lines.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc

IRON PIPE SIZE	SPECIFICATION DATA		PIPE SIZE, COUPLING	APP'X WT. PER 100 (LBS.)

# #192 Adjustable Pipe Saddle

**Finish:** Bare Metal, Zinc Plated, Hot Dipped Galvanized

**Material:** Carbon Steel, Stainless Steel 304SS & 316SS

**Approvals:** Complies with MSS-SP-69 (Type 38)

**Recommended:** Pipe stanchion support for stationary pipe where vertical adjustment is required.

IRON PIPE SIZE	SPECIFICATION DATA		APPROX. WT. PER 100 (Lbs)
	SADDLE MATERIAL	DIAMETER & LENGTH OF STEM	
2	1/4 x 1	5/8 x 8	100
2 1/2	1/4 x 1	5/8 x 8	140

### ADJUSTABLE PIPE SUPPORT #525 c/w U-BOLT

- 4" through 36"
- Carbon steel, saddle, support and U-Bolt.
- Bare Metal
- Complies with Manufacturers' Standardization Society  
MSS SP-58 and SP-69 (Type 36, 37)
- Designed to be used in conjunction with a base stand  
to support pipe running close to the floor.  
U-Bolt secures pipe to saddle.
- Specify pipe size, figure number, name and finish.  
Base stand ordered separately. Requires accurate center line  
of pipe to floor dimension "L".
- Also available in Electro-Plated Zinc, Stainless Steel

**ADJUSTABLE PIPE SADDLE SUPPORT #526**

2 1/2" through 36"

Carbon Steel Saddle and Nipple with  
Cast Iron Reducing Coupling

Bare Metal

Complies with MSS SP-58 and SP-69 (Type 38).

Pipe support for horizontal pipe lines where  
vertical adjustment is required.

Specify pipe size, figure number, name,  
finish.

Base stand ordered separately. Requires accurate  
center line of pipe to floor dimension "L".

Also available in Electro-Plated Zinc & 304/316SS

## ADJUSTABLE PIPE SADDLE SUPPORT #527 c/w U-BOLT

2 1/2" through 36"

Carbon Steel Saddle, nipple and U-Bolt  
with cast iron reducing coupling.

Bare Metal

Complies with MSS SP-58 and SP-69 (Type 37, 38).

Designed to be used in conjunction with a base stand  
to support horizontal pipe. Straight cut pipe thread on  
nipple provides adjustability, U-Bolt secures pipe to  
saddle.

Specify pipe size, figure number, name and finish.

Base stand ordered separately. Requires accurate  
center line of pipe to floor dimension "L".

Also available in Electro-Plated Zinc & 304/316SS

## #528KT ADJUSTABLE PIPE SADDLE SUPPORT KIT

Ductile iron saddle with carbon steel coupling, carbon steel nipple and base plate, cast steel reducing coupling, stainless steel set screws.

All items listed above are hot-dip galvanized except for stainless steel set screws.

Designed to support pipe horizontally. Straight cut pipe thread on nipple provides up to 4 1/2" of vertical adjustability.

Specify pipe size and figure number.

Saddles accommodate ductile iron pipe and IPS. Support requires 2" Schedule 40 (for 2" - 12") or 3" Schedule 40 (for 14" - 16") extension pipe to be cut in the field.

Also available in 316 stainless steel up to 12"

Complies with MSS SP-58 and SP-69 (Type 36, 38).

IPS or Ductile Iron Pipe Size	SPECIFICATION DATA				
	A	B	C	E	THREAD SIZE
2	1.750"	3.500"	1 1/2	3/8 x 2	1 1/4 - 7

## #529KT ADJUSTABLE PIPE SADDLE SUPPORT c/w U-BOLT KIT

Ductile iron saddle with carbon steel coupling, carbon steel nipple and base plate, cast steel reducing coupling, stainless steel set screws.

All items listed above are hot-dip galvanized except for stainless steel set screws.

Designed to support pipe horizontally. Straight cut pipe thread on nipple provides up to 4 1/2" of vertical adjustability.

Specify pipe size and figure number.

Saddles accommodate ductile iron pipe and IPS. Support requires 2" Schedule 40 (for 3" - 12") or 3" Schedule 40 (for 14" - 16") extension pipe to be cut in the field.

Also available in 316 stainless steel up to 12"

Complies with MSS SP-58 and SP-69 (Type 37, 38).

IPS or Ductile Iron Pipe Size	SPECIFICATION DATA				
	A	B	E	F	THREAD SIZE
3	2.030"	1 1/2	3/8 x 2	1/2-13	1 1/4 - 7

### SHORT ROLLER CHAIR #94S

- 2" through 14"
- Cast Iron Roller, Carbon Steel Chair and Hardware
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 44).
- Compact pipe support designed for pipe lines where horizontal movement may take place due to expansion and contraction.
- Specify pipe size, figure number, name and finish.
- Also available in Electro-Plated Zinc, Stainless Steel and Hot Dipped Galvanized

## ADJUSTABLE 2-ROD ROLLER HANGER #95

2" through 30"

Cast Iron Roller and Socket Ends, Carbon Steel Axle Rod  
Bare Metal

Complies with MSS SP-58 and SP-69 (Type 41).

Pipe support designed for pipe lines where  
horizontal movement may take place due to  
expansion and contraction.

Specify pipe size, figure number, name and finish.

Also available in Electro-Plated Zinc, Stainless Steel  
and Hot Dipped Galvanized

## ADJUSTABLE 2-ROD ROLLER SUPPORT #95S

- 2" through 30"
- Cast Iron Roller and Socket Ends, Carbon Steel Axle Rod and 2 Drop Rods c/w 8 Hex. Nuts
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 41).
- Designed for the support of pipe where longitudinal movement may occur due to expansion and contraction, and vertical adjustment of up to 6 inches may be necessary.
- Specify roller size, figure number, name and finish.
- Also available in Electro-Plated Zinc
  
- *Please remember to consider insulation thickness when sizing rollers.*

**PIPE ROLL STAND #279S**

- 2" through 42"
- Cast Iron Roller, Carbon Steel Chair and Axle
- Bare Metal
- Complies with MSS SP-58 and SP-69 (Type 44).
- For support of pipe where longitudinal movement may occur due to expansion and contraction and where vertical adjustment is not necessary.
- Specify rod size, figure number, name and finish.
- Also available in Electro-Plated Zinc, and Hot Dipped Galvanized

**CHANNEL ASSEMBLY #170**

- Carbon Steel
- Bare Metal or Galvanized
- Specify Fig. #170 channel assembly, channel size, rod size, name, finish and C to C.  
Note: that  $L = (C \text{ to } C) + 2M + W$
- Can also be used with a U-Bolt Fig. #14 & Fig. #80 washer plates to secure pipe to the center of channel assembly.

### MEDIUM WELDED BRACKET #801

- Mild Steel
- Bare Metal
- Recommended for the support of pipe loads up to 1500 lbs  
Constructed of facing angle iron with 1" space. The bracket provides maximum lateral adjustment when carrying or suspending pipe.
- Complies with MSS SP-58 and MSS SP-69 (Type 32).
- Specify size number, name, and finish
- Also available in Electro-Plated Zinc, Stainless Steel and Hot Dipped Galvanized.

### HEAVY WELDED BRACKET #802

- Mild Steel
- Bare Metal
- Recommended for the support of pipe loads up to 3000 lbs  
Constructed of facing angle iron with 1" space. The bracket provides maximum lateral adjustment when carrying or suspending pipe.
- Complies with MSS SP-58 and MSS SP-69 (Type 33).
- Specify size number, name, and finish
- Also available in Electro-Plated Zinc, Stainless Steel and Hot Dipped Galvanized.
