# NIBCO®

AHEAD OF THE FLOW®

Specialty Valve Products

# Business-to-Business Solutions

Look to NIBCO for technology leadership.

The velocity with which e-business evolves demands that new products and services be continuously developed and introduced to keep our customers at the center of our business efforts. NIBCO provides an entire suite of business-to-business solutions that is changing the way we interact with customers.

[NIBCOpartner.com<sup>SM</sup>](http://NIBCOpartner.com) is an exclusive set of secure web applications that allow quick access to customer-specific information and online order processing. This self-service approach gives you 24/7 access to your order status putting you in total control of your business.

Real time information includes:

- Online order entry
- Viewable invoices & reports
- Inventory availability
- Current price checks
- Order status
- Online library of price sheets, catalogs & submittals

**Electronic Data Interchange (EDI)** makes it possible to trade business documents at the speed of light. This technology cuts the cost of each transaction by eliminating the manual labor and paperwork involved in traditional order taking. This amounts to cost-savings, increased accuracy and better use of resources.

With EDI, you can trade:

- Purchase orders
- PO Acknowledgements
- Invoices
- Product activity data
- Advanced ship notices
- Remittance advice

**Vendor Managed Inventory (VMI)**, a sophisticated service for automated inventory management, reduces your overhead by transferring inventory management, order entry and forecasting to NIBCO. This is an on-going, interactive partnership with NIBCO.

Through automation, VMI brings results:

- Improves customer service
- Optimum inventory efficiencies
- Better forecasting
- Cuts transaction costs
- Peace of mind
- Relief from day-to-day management

Note: Pocket ends per ASTM D 2846. NSF61 Approved

**WARNING:** This product can expose you to chemicals including styrene, which is known to the State of California to cause cancer. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**\* DO NOT USE OR TEST THE PLASTIC VALVES LISTED IN THIS CATALOG WITH COMPRESSED AIR OR OTHER GASSES.**

# FAUCETLOCK™

## Protect Your Water Supply

Perfect for use in your:

- Front & Backyard,
- Vacation Home, Condo,
- Apartment House,
- Dock, Campsite,
- Storefront, School,
- Trailer Park,
- Parking Lot,
- Gas Station...

**Save Water ... Save Money**

### FaucetLock™

Fits standard 3/4" hose thread

**Extra Key Included**  
**No Tools Required**  
**Twist On & Lock**

PATENT PENDING

### Installation Instructions

1. Inspect FaucetLock's threads for dirt and debris, and clean if necessary.
2. View lock, make sure key notches are in aligned (OPEN) position. (See Figure A)
3. Hold lock by its textured ring and screw onto hose bibb in a clockwise direction until tight.
4. Insert key and turn clockwise half a turn then remove key. FaucetLock is now in its secured and locked position. (See Figure B) (FaucetLock is secured on hose bibb if the textured ring spins freely)
5. To remove FaucetLock, insert key and rotate half a turn counterclockwise. Remove key. Hold textured ring and turn counterclockwise until FaucetLock screws off the hose bibb.
6. While FaucetLock is detached from hose bibb, be careful not to allow dirt or debris to get into lock or threads.

*Freezing weather precaution: If installed on a frostproof sillcock, make sure valve has had time to drain after closing and before installation of FaucetLock™.*

# Low Pressure Valve Handwheel Options & Accessories

<p><b>Standard No Kink and Hose Bibbs Tee Handle</b>                  Sizes 1/2" - 3/4".                  Available as standard for all NIBCO valves with spline drive. Blue or silver color</p>	
<p><b>Cross Handles for the Classic Pro and T or S29 Valves</b>                  Available for Classic Pro or T/S 29 Valves 1/2" thru 2".                  Used where standard handwheel would be out of reach or hand space is restricted.                  For field replacement, specify valve type and size. Spline drive only.</p>	
<p><b>Iron Handwheel for Brass Gate Valves</b>                  Available for NIBCO 1/4" thru 4".                  For field replacement, specify valve type and size. Square Stem Only.</p>	
<p><b>Lock Shield Bonnet Assembly Lockshield</b>                  Available for NIBCO Classic Pro and Husky Valves 1/2"-3/4", except straight hose bibbs.                  Use where valve might be subject to unauthorized use or tampering.</p>	
<p><b>Lockshield Handwheel</b>                  Available for NIBCO Classic Pro and Husky Valves, except straight bibbs.                  Used as handle for lockshields. Specify – "Lockshield Handle."                  For field replacement, specify valve type and size. Spline drive only.</p>	
<p><b>Classic Pro Handwheel (2 1/8" Round)</b>                  Available for NIBCO Classic Pro valves 1/2"-3/4".                  Fits spline stem only. Available in blue or red.</p>	
<p><b>29 Replacement Handwheel</b>                  Available for NIBCO S or T 29 Bronze Gate Valve sizes 1/2"-2".                  For field replacement only.</p>	
<p><b>Stem Extension</b>                  Available for any 1/2" - 2" 580-A Series and 1/4" - 4" FP-600-A Series brass ball valves.                  Allows for 2" of insulation.</p>	
<p><b>Waste Cap with Rubber Gasket</b>                  A fast and convenient means for draining sections of line between valves.                  Fits NIBCO Low Pressure Valves sizes 1/4" - 3/4".</p>	
<p><b>C750 Vacuum Breaker</b>                  Fits 3/4" hose thread ends — hose bibbs, sillcocks, boiler drains.                  Break off screw for permanent installation.</p>	

NIBCO INC. reserves the right to change materials, options and accessories without notice.

# Installations Instructions for Metal Connections

Analyze the application to determine which valve is best suited for installation, keeping in mind the service for which the valve is recommended. Before installing the correct valve, review the following installation instructions to prevent damage to the valve and assure its maximum efficiency.

For Plastic Installation Instructions, contact Technical Services at 1.888.446.4226.

## SOLDERING

1. Cut tube end square. Ream, burr and size.

2. Use sand cloth or steel wire brush to clean both tube and cup to a bright metal. Steel wool is **not** recommended.

3. Apply flux to outside of tube and inside of solder cup. Surfaces to be joined must be completely covered. Use flux sparingly.

4. **Be sure that valve is fully open.** This applies only to globe and gate valves. Apply heat to tube first. Transfer as much heat as possible through the tube into the valve. Avoid prolonged heating of the valve itself. **For ball valves,** consult the installation instruction sheet or contact NIBCO Technical Services for assistance.

5. Use just enough solder: with wire solder, use 1" for 3/4" valve, etc. If too much solder is use, it may flow past tube and clog seating area. **The correct amount of solder is 1½ times the diameter of the fitting or valve.**

6. Remove excess solder with small brush while plastic (soft), leaving a fillet around end of valve as it cools.

## BRAZING

The strength of a brazed joint does not vary appreciably with the different brazing materials, but depends to a large extent upon the maintenance of proper clearance between the outside of the tube and the valve socket. The interior dimensions of brazing valve sockets are machined to the closest tolerances and finished smooth to promote full capillary attraction.

NOTE: Care should be observed in cleaning and in removing residues of the cleaning medium. Attempting to braze a contaminated or improperly cleaned surface will result in an unsatisfactory joint. Brazing alloys will not flow over or bond to oxides. Oily or greasy surfaces repel fluxes, leaving bare spots that oxide and result in voids and inclusions.

## Installation Instructions for Metal Connections (cont.)

1. Cut tube end square to exact length needed, so that tube will enter valve socket all the way to the shoulder. Ream, burr and file.

2. Clean tube to a distance slightly more than what will fit into the socket, and clean valve socket. Wire brushes may be used, but avoid removing an excessive amount of metal. Fine sand cloth or emery cloth may be used with the same precautions. Steel wool is **not** recommended.

3. Apply flux to tube and socket sparingly and with a fairly thin consistency. Avoid flux on areas not cleaned, particularly inside of tube.

4. Assemble parts to be brazed. If fluxed parts are allowed to stand, the water in the flux will evaporate. Dried flux is liable to flake off, exposing metal surfaces to oxidation. Assemble joint by inserting tube into socket hard against the stop. The assembly should be firmly supported so that it will remain in alignment during the brazing operation. **Removal of bonnet is recommended when installing globe valves with soft seats.**
5. Apply heat to parts to be joined. The preferred method is by oxy-acetylene flame. Heat tube first, beginning one inch from edge of valve. Sweep flame around tube in short strokes up and down at right angles to run of tube. To avoid burning through tube, the flame should be in continuous motion and not allowed to remain on any one point.

Apply flame to valve at base of socket. Heat uniformly, sweeping flame from fitting to tube until flux on fitting becomes quite. Avoid excessive heating of valve.

When flux appears liquid and transparent on both tube and valve, start sweeping flame back and forth along axis of joint to maintain heat on parts to be joined, especially toward the base of the valve socket.

6. Apply brazing wire or rod at point where tube enters valve socket. Keep flame away from rod or wire as it is fed into the joint. Move flame back and forth as alloy is drawn into joint. When the proper temperature is reached, alloy will flow readily into space between tube outer wall and valve socket. When joint is filled, a continuous rim of brazing alloy will be visible.

### THREADING

Grit, dirt or any foreign matter accumulated in the pipe can hinder efficient valve operation and seriously damage vital valve parts. Thoroughly clean pipe internally with air or steam.

When threading pipe, gauge pipe threads for size and length to avoid jamming pipe against seat and disc. Thoroughly clean threaded end to remove any harmful steel or iron deposits. Apply pipe dope sparingly on pipe threads, never on valve threads. Do not allow any pipe dope into valve body in order to avoid damage to disc and seat.

Before installation, check line of flow through valve so that valve will function properly. Close valve completely before installation. Apply wrench to hex next to pipe and guard against possible distortion. After installation of valve, support the pipe line; a sagging pipe line can distort the valve and cause failure.

### COMPRESSION

For compression end connection, first slide compression nut onto copper tube, then slide on ferrule. Install the valve onto the copper tube and gently slide compression nut and ferrule up to the valve to engage. Do not use pipe dope. Tighten nut until resistance is felt. Tighten additional 1/2 turn. **DO NOT OVER TIGHTEN!**

# Installation Instructions for Frostproof Sillcock

## HOW THE FIGURE 95C WORKS

As shown on the schematic drawing on the right, the closing member (stem and disc assembly) of the Figure 95C Frostproof Sillcock operates by turning the handle in a clockwise manner to close and counter-clockwise to open.

The valve's seat is at the opposite end from the handle. The valve is designed so that the seat area is situated safely behind the insulation of the home's exterior wall. This is to prevent the seat area from being exposed to freezing temperatures. Depending on the region of installation, the stem length is available in varying dimensions to accommodate the various insulation thicknesses behind the wall. The valve's "rough-in" dimension (see "A" dimension) pertains to the thickness of insulation and is measured from the frostproof sillcock's flange to the valve seat and is available in lengths 4", 6", 8", 10", 12" and 14".

The Figure 95C is designed to employ an integral back-flow prevention device to prevent potential back-siphonage. This back-siphonage, if unchecked, could compromise the safe potable water supply to the home, resulting in sickness or death.

The independent testing bodies, American Society of Sanitary Engineering and Canadian Standards Association, have validated the valve's primary and preventative functions.

## TIPS FOR LONG LIFE

1. The hose should be carefully moved about, so as not to cause abnormal tension via pulling and/or jerking.
2. If the hose is left on the Figure 95C in freezing weather, the valve's self-draining feature will protect the sillcock from freeze damage if: 1) the nozzle is not left affixed to the hose; and 2) the entire hose length is on a plane lower than the fixed position of the frostproof sillcock.
3. The key to the Figure 95C being able to withstand and operate in freezing weather is that the closing member (seat disc) is inside the heated building. If the heat is temporarily shut down for a length of time that would allow freezing to take place, all water lines should be drained.
4. The figure 95C closes at the inlet of the sillcock. You will notice that it will drip for a few seconds after being closed. Wait at least 10 seconds.

## INSTALLATION INSTRUCTIONS

1. Bore a 1 1/4" dia. hole through the wall in the desired position. A slight upward slope when drilling hole will aid sillcock in draining.
2. Insert the sillcock through the hole and position spout downward. To help position the sillcock from inside the building, "TOP" is marked on the inlet end.
3. Connect water supply line to sillcock inlet using appropriate style connection.
4. Secure sillcock flange to wall using suitable screws. For installation on lapped siding, a plastic siding plate is supplied to give a finished look.

\* **Warning: Avoid overheating when soldering — it could cause internal damage to seat area.**

## NIBCO® Specialty Valve Products Warranty

### NIBCO INC. LIMITED WARRANTY

Applicable to NIBCO INC. Specialty Valve Products Only

NIBCO INC. warrants each NIBCO® specialty valve products to be free from defects in materials and workmanship under normal use and service for a period of two (2) years from date of purchase.

In the event any defect occurs which the owner believes is covered by this warranty, the owner should immediately contact NIBCO Technical Services, either in writing or by telephone at 1.888.446.4226 or 1.574.295.3000. The owner will be instructed to return said valve, at the owner's expense, to NIBCO INC., or an authorized representative for inspection. In the event said inspection discloses to the satisfaction of NIBCO INC. that said valve is defective, a replacement shall be mailed free of charge to the owner, and NIBCO INC. shall further pay the installing contractor the sum of fifty (\$50.00) dollars to be applied toward the cost of installation of the replacement valve.

TO THE EXTENT PERMITTED BY LAW, THIS WARRANTY SPECIFICALLY EXCLUDES INCIDENTAL AND CONSEQUENTIAL DAMAGES OF EVERY TYPE AND DESCRIPTION RESULTING FROM ANY CLAIMED DEFECT IN MATERIAL OR WORKMANSHIP, INCLUDING BUT NOT LIMITED TO, PERSONAL INJURIES AND PROPERTY DAMAGES.

Some states or countries do not allow the exclusion or limitation of incidental or consequential damages so these limitations may not apply to you.

TO THE EXTENT PERMITTED BY LAW, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state and country to country.

## How to Order

State quantity, figure number and size for each valve or fitting you wish to order. See individual catalog pages for specific or special product designations.

### HOW MANY TO ORDER

NIBCO valves and fittings are decimal packed for your convenience in handling, shipping and stock-keeping. Number in master carton varies with item.

### POLICY ON RETURNS TO FACTORY

No NIBCO valves and fittings are to be returned without prior written agreement. Transportation must be prepaid. A 20% charge will be made to cover cost of rehandling and reinspection.

### TECHNICAL ASSISTANCE

Engineers, contractors, wholesalers or manufacturers may obtain special or technical assistance from any factory representative of NIBCO. Write, fax or phone.

NIBCO INC.

globally connecting you at all levels

It's a new age of business, and a new way at NIBCO. From Elkhart, Indiana to Lodz, Poland, and points beyond, our company has integrated manufacturing, distribution, and networked communications to provide a seamless source of information and service, 24 hours a day, 7 days a week. But this integration hasn't happened overnight. It's been part of a long-term strategic process that has pushed us to reconsider every aspect of our business. The result? We're a vertically integrated manufacturer with the products and systems in place to deliver low cost and high quality. NIBCO products are manufactured under a Quality Management System conforming to the current revision of ISO-9001 International Standards. We know the flow control industry is only going to get more demanding, and we are more than ready. We will continue to lead. That's what NIBCO is all about.

## VALVES

Pressure-rated bronze, iron and alloy-iron gate, globe and check valves • Pressure-rated bronze ball valves • Boiler specialty valves • Commercial and industrial butterfly valves • Lined butterfly valves • Circuit balancing valves • Carbon and stainless steel ball valves • ANSI flanged steel ball valves • Lined ball valves • Pneumatic and electric actuators and controls • Grooved ball and butterfly valves • High performance butterfly valves • UL/FM fire protection valves • MSS specification valves • Bronze specialty valves • Low pressure gate, globe, check and ball valves • Frostproof sillcocks • Quarter-turn supply stops • Quarter-turn low pressure valves • PVC and CPVC plumbing and industrial ball valves • Bronze & Iron Y-strainers • Sample valves • Sanitary valves • Lead-Free\* valves • Coil-Connect® Kits

\*Weighted average lead content  $\leq 0.25\%$

## FITTINGS

Wrot and cast copper pressure and drainage fittings • Cast copper alloy flanges • Wrot and cast press fittings • ABS and PVC DWV fittings • Schedule 40 PVC pressure fittings • CPVC CTS fittings • CPVC CTS-to-metal transition fittings • Schedule 80 PVC and CPVC systems • CPVC BlazeMaster® fire protection fittings • Lead-Free\* fittings

BlazeMaster® is a registered trademark of The Lubrizol Corporation.

\*Weighted average lead content  $\leq 0.25\%$

## FLEXIBLE PIPING SYSTEMS

PE-RT and PEX tubing for potable and radiant applications • Insulated tubing • Risers • Ice maker tubing • Silicon Performance Bronze® fittings • Poly alloy fittings • Home Run Manifold® • Radiant heat manifolds • Ball valves and supply stops • Connections, tools and accessories • Radiant heat controls and panels

## INDUSTRIAL PLASTICS

Thermoplastic pipe, valves, and fittings in PVC, Corzan® CPVC, polypropylene and PVDF Kynar® • Pneumatic and electric actuation systems • BlazeMaster® CPVC fire protection fittings

BlazeMaster® and Corzan® are registered trademarks of the Lubrizol Corporation • Kynar® is a registered trademark of Arkema Inc.
