# ENGINEERING CONFIDENCE

INTO EVERY BUILD

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

Look inside many of the world's most recognizable landmarks and industrial facilities, and you will find Victaulic solutions at work making bold innovations possible. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions.

From concept to commissioning, Victaulic provides innovative piping products and design services that help  
**ENGINEER CONFIDENCE INTO EVERY BUILD.**

## TABLE OF CONTENTS

ii	Continuing Education
iii	Victaulic Virtual Design and Construction
iv	The Victaulic Difference
1	Original Groove System (OGS)
29	Advanced Groove System (AGS)
37	Victaulic® Bolted Split-Sleeve Products (VBSP)
43	Hole Cut System
47	Plain End System for Carbon Steel
49	Stainless Steel System
65	Copper System
71	Shouldered Steel System
75	Ductile Iron System
81	High Performance System for Steam and Chemical Services
83	Hydronic Balancing Solutions
97	Refuse-to-Fuse™ HDPE System
101	Aquamine™ PVC System
107	CPVC/PVC System
111	Pipe Preparation Tools
141	Gaskets/Seals/O-Rings
143	Design Data
144	Warranty
145	Reference Guide

# CONTINUING EDUCATION

Victaulic® offers a wide variety of continuing education courses. From one-hour seminars to full-day events, these courses provide education on key industry concepts and Victaulic solutions. Created for owners, engineers, contractors, the inspection community, and anyone else seeking to expand their knowledge of Victaulic and the industry surrounding the grooved pipe joining and flow control markets.

For more information on the Victaulic Continuing Education courses or to schedule your training, please contact your local sales representative or email us at:  
[VictaulicUniversity@victaulic.com](mailto:VictaulicUniversity@victaulic.com)

# VIRTUAL DESIGN AND CONSTRUCTION

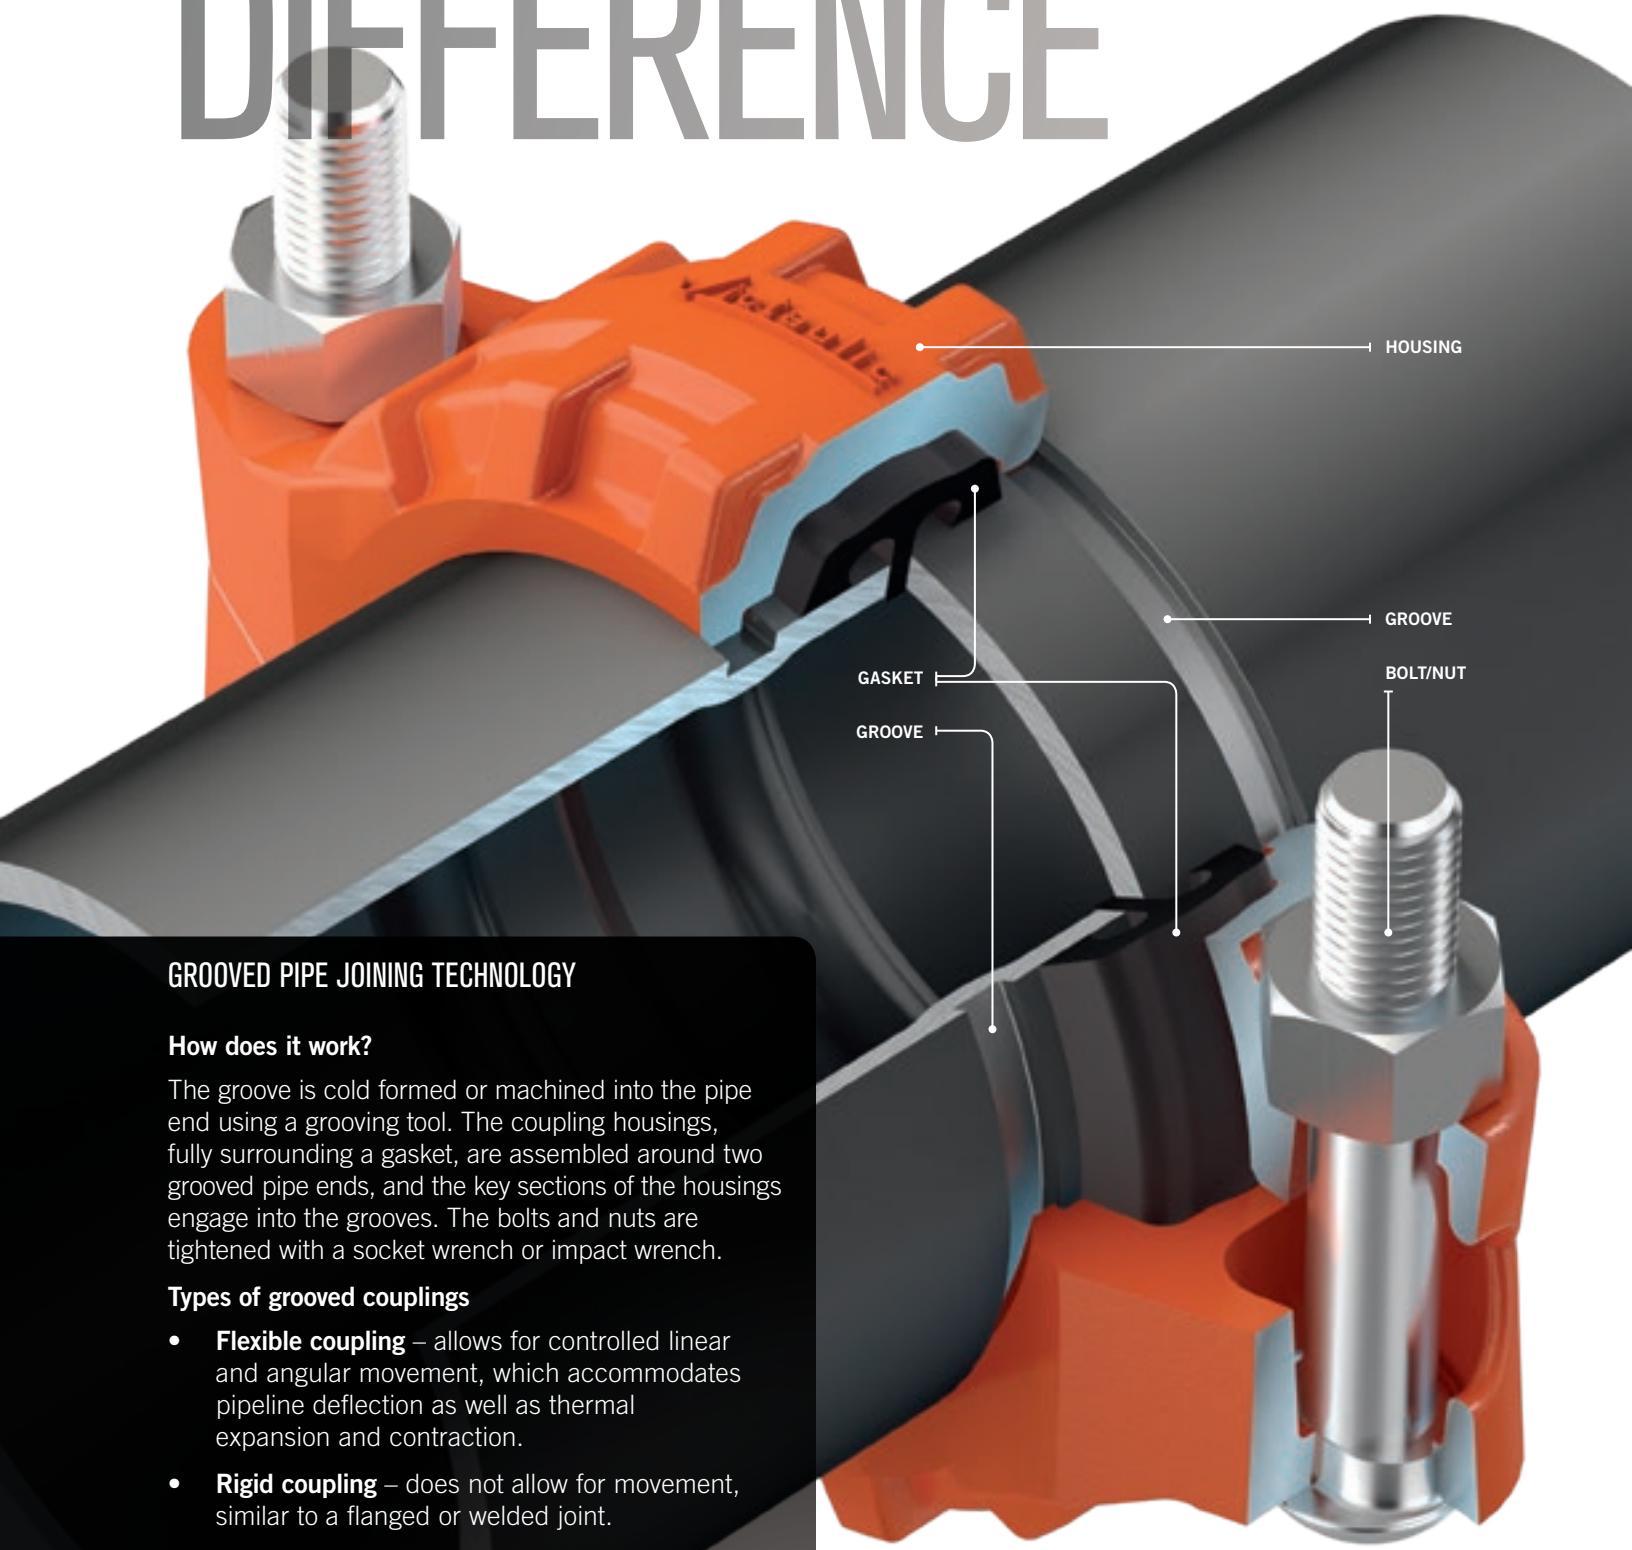

Drawing, BIM coordination and software solutions for the commercial construction industry. [Victaulic.com/resources-software](http://Victaulic.com/resources-software) offers an extensive library of CAD files and software product content created in each software's native platform.

## FASTER FROM THE START<sup>SM</sup>

Victaulic Tools for Revit® provides an intuitive set of tools that are purposely built to improve pipe routing and fabrication functionality in Revit® 2015 through 2019, including Fabrication Parts. It's specifically designed to meet the needs of engineers, contractors and pipe fabricators – giving you smarter tools to fabricate faster and route more efficiently. [victaulicsoftware.com](http://victaulicsoftware.com)

# THE VICTAULIC® DIFFERENCE

## GROOVED PIPE JOINING TECHNOLOGY

### How does it work?

The groove is cold formed or machined into the pipe end using a grooving tool. The coupling housings, fully surrounding a gasket, are assembled around two grooved pipe ends, and the key sections of the housings engage into the grooves. The bolts and nuts are tightened with a socket wrench or impact wrench.

### Types of grooved couplings

- **Flexible coupling** – allows for controlled linear and angular movement, which accommodates pipeline deflection as well as thermal expansion and contraction.
- **Rigid coupling** – does not allow for movement, similar to a flanged or welded joint.

At the core of all the benefits that Victaulic® [solutions](#) bring to a project – such as productivity, safety, design flexibility and quality – are the unique features of our products.

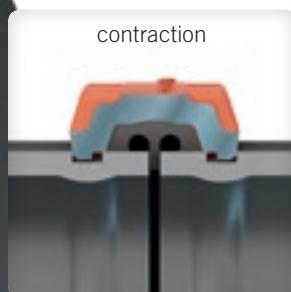

## VICTAULIC GROOVED END PIPING SYSTEMS PROVIDE:

**Easy system maintenance and expansion** – through simple coupling disassembly that allows for easy access.

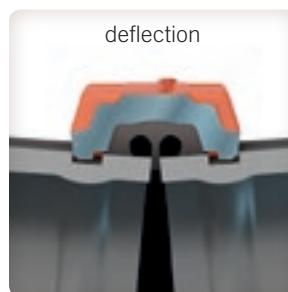

**Alignment ease** – through a design that allows for full rotation of the pipe and system components before tightening.

contraction

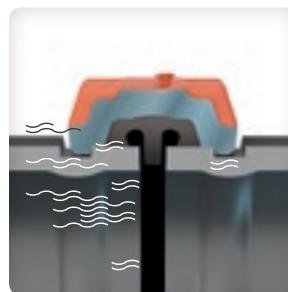

expansion

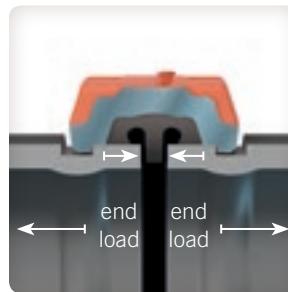

deflection

**Flexibility** – with the inherent axial movement and deflection properties of flexible couplings in a groove system. May be used to accommodate pipeline thermal expansion and contraction, misalignment and settlement, and seismic stresses.

**Noise and vibration attenuation** – by isolating the transference of vibration at each joint.

end load      end load

**Self restrained pipe joints** – Couplings engage the pipe grooves to hold the pipes against full pressure thrust loads without the need of supplemental restraints.

**Rigidity** – with an angled bolt pad design that provides positive clamping of the pipe to resist torsional and flexural loads.

**Couplings**

The Victaulic® grooved piping system is the most versatile, economical, and reliable piping system available. Up to three times faster to install than a welded system, and more dependable than a threaded or flanged assembly, the Victaulic approach reduces risk and total installed cost. The system is designed for roll grooved or cut grooved standard pipe or roll grooved light wall pipe. Also, pipe end preparation is fast and easy. It can be done on the job site or in the shop with a variety of *Victaulic* grooving tools.

With the introduction of *Victaulic* Installation-Ready™ technology, the original groove system has evolved to a new level. Grooved couplings featuring this patented *Victaulic* technology install ten times faster than other pipe joining methods. Why is it different? Prior to *Victaulic* Installation-Ready technology, grooved coupling assembly

consisted of disassembling the coupling by removing the bolts and nuts, removing the gasket, fitting the gasket over the gap between two grooved pipe ends, positioning the housings around the gasket, and tightening down the bolts and nuts. Couplings featuring *Installation-Ready* technology come pre-assembled and are simply pushed onto a grooved pipe end, joined by a second grooved pipe end, and then the bolts and nuts are tightened down. What previously required minutes, now takes only seconds.

## Original Groove System (OGS)

## Mover Expansion Joint

### STYLE 150

[Download publication 09.04](#) for complete information

- Slip-type expansion joint providing up to 3" | 76 mm axial end movement
- Sizes from 2–6" | DN50–DN150
- Pressures up to 350 psi | 2413 kPa | 24 bar

## Expansion Joint

### STYLE 155

[Download publication 09.05](#) for complete information

- Combination of grooved flexible couplings and short nipples, joined in tandem to provide increased expansion
- Style 155 grooved expansion joints are rated to the working pressure of the coupling used
- Sizes from ¾–12" | DN20–DN300
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.12](#) for information on Style W155

## Vic™-300 MasterSeal™ Butterfly Valve SERIES 761

[Download publication 08.20 for complete information](#)

- Designed for bi-directional, dead end services to full working pressure
- Available without handle, with gear operator, with lever lock handle and memory stop, or with 10-position handle and memory stop
- Multiple seat and disc material options available
- Sizes from 2–12" | DN50–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.06](#) for information on Series W761

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

[Download publication 02.06](#) for ANSI/NSF Potable Water Approvals/Listings

## Butterfly Valve SERIES 700

[Download publication 08.05 for complete information](#)

- Two-piece stem permits narrow disc design for low pressure drop performance
- Supplied standard with aluminum bronze disc, 316 stainless steel optional
- Sizes from 1½–6" | DN40–DN150
- Pressures up to 200 psi | 1379 kPa | 14 bar

### Certifications/Listings:

## High Pressure Vic-Check Valve

### SERIES 716H

[Download publication 08.08](#) for complete information

- Features a stainless steel disc which seats against the o-ring seal, when mounted on the electroless nickel plated face
- Sizes from 2–3" | DN50–DN80
- Pressures up to 365 psi | 2517 kPa | 25 bar
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.08](#) for information on Series W715

## Vic-Check Valve

### SERIES 716

[Download publication 08.08](#) for complete information

- Features an elastomer encapsulated disc and a welded in nickel seat
- Sizes from 2½–12" | 73.0 mm–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.08](#) for information on Series W715

## Venturi Check Valve

### SERIES 779

[Download publication 08.10](#) for complete information

- Check valve with integrated venturi with pressure taps for accurate measurement (flow measuring kit for differential pressure gauges/meters available)
- Sizes from 4–12" | DN100–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar

**Certifications/Listings:**

[Download publication 10.01](#) for Fire Protection Certifications/Listings

**Certifications/Listings:**

[Download publication 10.01](#) for Fire Protection Certifications/Listings

**Swing Check Valve****SERIES 712**

[Download publication 08.11](#) for complete information

- Designed for use with Victaulic® grooved fittings and couplings for fast installation on inlet and outlet ports
- Large access bonnet for easy maintenance
- Available with internal coating for corrosive services
- Sizes from 2–4" | DN50–DN100
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For more information on swing check valves for stainless steel, see pg. 56
- Regional availability, contact [Victaulic](#) for details

**Swing Check Valve****SERIES 713**

[Download publication 08.54](#) for complete information

- High pressure check valve designed for use with Victaulic grooved fittings and couplings for fast installation on inlet and outlet ports
- Large access bonnet for easy maintenance
- Available with internal coating for corrosive services
- Sizes from 2–4" | DN50–DN100
- Pressures up to 1000 psi | 6895 kPa | 69 bar for 2" | DN50 and 750 psi | 5171 kPa | 52 bar for 2½–4" | 73.0 mm–DN100
- Regional availability, contact [Victaulic](#) for details

**Vic-Ball Valve****SERIES 721**

[Download publication 08.14](#) for complete information

- Floating ball with standard port, reduces torque requirements
- Sizes from 4–6" | DN100–DN150
- Pressures up to 800 psi | 5515 kPa | 55 bar

## Original Groove System (OGS)

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## Vic-Ball Valve

### SERIES 726

[Download publication 08.23](#) for complete information

- High pressure standard port NACE-compliant ball valve
- Available without handle, with a lever operator, or a gear operator
- Sizes from 1½–6" | DN40–DN150
- Pressures up to 1000 psi | 6895 kPa | 69 bar

## Ball Valve

### SERIES 727

[Download publication 08.42](#) for complete information

- High pressure enhanced port NACE-compliant ball valve
- Up to 1/3 better flow than competitive standard port ball valves
- Floating ball with standard port, reduces torque requirements
- Sizes from 2–6" | DN50–DN150
- Pressures up to 1500 psi | 10342 kPa | 103 bar

## Brass Body Ball Valve — Threaded

### SERIES 722

[Download publication 08.15](#) for complete information

- Standard port, female threaded end valve constructed from forged brass
- Sizes from ¼–2" | DN8–DN50
- Pressures up to 600 psi | 4137 kPa | 41 bar

## Vic-Plug Valve

SERIES 377

[Download publication 08.12 for complete information](#)

- Only eccentric grooved end plug valve made specifically for throttling services
- Available without handle, with lever operator or gear operator
- Sizes from 3–12" | DN80–DN300
- Pressures up to 175 psi | 1207 kPa | 12 bar

## Delta-Y Valve Assembly

STYLE DLY

[Download publication 07.08 for complete information](#)

- Assembles with Style 107N rigid couplings, Series 761 Vic™-300 MasterSeal™ butterfly valves, and cast fittings
- Ideal for bulk cement/barite systems commonly found on offshore drilling platforms
- Sizes from 5–6" | 141.3 mm–DN150
- Pressures up to 300 psi | 2068 kPa | 21 bar

Certifications/Listings:

[Download publication 10.01 for Fire Protection Certifications/Listings](#)

## Knife Gate Valve

SERIES 795

[Download publication 08.25 for complete information](#)

- Designed for fluid lines containing solids and abrasive materials
- All wear parts can be replaced in-line without removing the valve from the pipeline
- Utilizes Installation-Ready™ technology to eliminate loose parts
- Manual, hydraulic, pneumatic, and electric actuation available
- Sizes from 3–12" | DN80–DN300
- Pressures up to 150 psi | 1035 kPa | 10 bar

## Original Groove System (OGS)

### Certifications/Listings:

This product is not agency listed for fire protection service.  
[Download publication 10.92](#) for fire service products.

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## OS&Y Gate Valve

### SERIES 771M

[Download publication 08.45](#) for complete information

- Available as groove x groove or groove x flange
- For On/Off service only
- Sizes from 2½–12" | 73.0mm–DN300
- Pressures up to 250 psi | 1724 kPa | 17 bar

## Three Port Diverter

### SERIES 723

[Download publication 08.13](#) for complete information

- NACE MR-01-75 compliant, three-port ball valve with common bottom inlet for diverting flow 90° left or right
- Available without handle, with lever operator or gear operator
- Available in 2" | DN50
- Pressures up to 600 psi | 4137 kPa | 41 bar

## Diverter Valve

### SERIES 725

[Download publication 08.40](#) for complete information

- Intended for use in backfill mining operations
- Provides 180° service for increased efficiency and reduced downtime
- Available in 6" | DN150
- Pressures up to 1000 psi | 6895 kPa | 69 bar
- Regional availability, contact [Victaulic](#) for details

## Hydraulic Control Valve

BERMAD SERIES 100 | VICTAULIC SERIES 910

[Download publication Engineering 100](#)

for complete information

- Hydraulic control valves are devices capable of controlling variables such as pressure, flow, or level
- Optional configurations include: On/Off, Pressure Reducing, Pressure Relief, Pressure Sustaining, and Flow Control (Customized solutions can include combinations of the above functions)
- Sizes from 1½– 6" | DN40–DN150
- Pressures up to 145 psi | 1000 kPa | 10 bar
- Regional availability, contact [Victaulic](#) for details

## Hydraulic Control Valve

BERMAD SERIES 700 | VICTAULIC SERIES 970

[Download publication Engineering 700](#)

for complete information

- Hydraulic control valves are devices capable of controlling variables such as pressure, flow, or level
- Optional configurations include: On/Off, Pressure Reducing, Pressure Relief, Pressure Sustaining, and Flow Control (Customized solutions can include combinations of the above functions)
- Sizes from 1½–48" | DN40–DN1200
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Regional availability, contact [Victaulic](#) for details

## Hydraulic Control Valve

BERMAD SERIES 800 | VICTAULIC SERIES 980

[Download publication Engineering 800](#)

for complete information

- Hydraulic control valves are devices capable of controlling variables such as pressure, flow, or level
- Optional configurations include: On/Off, Pressure Reducing, Pressure Relief, Pressure Sustaining, and Flow Control (Customized solutions can include combinations of the above functions)
- Sizes from 1½–20" | DN40–DN500
- Pressures up to 600 psi | 4137 kPa | 41 bar
- Regional availability, contact [Victaulic](#) for details

## Original Groove System (OGS)

### Automatic Air Release Valve

BERMAD SERIES A30 | VICTAULIC SERIES 9A3

[Download publication Engineering A30](#)  
for complete information

- Automatic air release valves allow efficient release of air bubbles from pressurized pipe lines
- Body material: Glass reinforced nylon
- Sizes from  $\frac{3}{4}$  – 1" | DN20 – DN25
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Temperatures up to 140°F | 60°C
- Regional availability, contact [Victaulic](#) for details

### Automatic Air Release Valve

BERMAD SERIES A71 | VICTAULIC SERIES 9A7

[Download publication Engineering A71](#)  
for complete information

- Automatic air release valves allow efficient release of air bubbles from pressurized pipe lines
- Body material: Type 316 stainless steel
- Sizes from  $\frac{3}{4}$  – 1" | DN20 – DN25
- Pressures up to 350 psi | 2413 kPa | 24 bar
- Temperatures up to 140°F | 60°C
- Regional availability, contact [Victaulic](#) for details

### Combination Air Valve

BERMAD SERIES C30 | VICTAULIC SERIES 9C3

[Download publication Engineering C30](#)  
for complete information

- Combination air release valves release air bubbles from pressurized pipe lines (air release valve), while evacuating air during pipeline filling and draining (air/vacuum valve)
- Body material: Glass reinforced nylon
- Sizes from  $\frac{3}{4}$  – 1" | DN20 – DN25
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Temperatures up to 140°F | 60°C
- Regional availability, contact [Victaulic](#) for details

## Combination Air Valve

BERMAD SERIES C50 | VICTAULIC SERIES 9C5

[Download publication Engineering C50](#)  
for complete information

- Combination air release valves release air bubbles from pressurized pipe lines (air release valve), while evacuating air during pipeline filling and draining (air/vacuum valve)
- Body material: Glass reinforced nylon
- Sizes from 2–4" | DN50–DN100
- Pressures up to 150 psi | 1034 kPa | 10 bar
- Temperatures up to 140°F | 60°C
- Regional availability, contact [Victaulic](#) for details

## Combination Air Valve

BERMAD SERIES C70 | VICTAULIC SERIES 9C7

[Download publication Engineering C70](#)  
for complete information

- Combination air release valves release air bubbles from pressurized pipe lines (air release valve), while evacuating air during pipeline filling and draining (air/vacuum valve)
- Body material: Ductile iron (standard)
- Sizes from 2–8" | DN50–DN200
- Pressures up to 580 psi | 3999 kPa | 40 bar
- Temperatures up to 140°F | 60°C
- Regional availability, contact [Victaulic](#) for details

## Original Groove System (OGS)

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## Suction Diffuser

### SERIES 731-D

[Download publication 09.20](#) for complete information

- Allows building up at a 90° angle from the pump, saving valuable space in the mechanical room while still protecting the pump against cavitation
- Available flanged connections: ANSI Class 150, Australian Standard Table E, PN10/16, GB, and JIS 10K
- Sizes from 3–12" | DN80–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.20](#) for information on Series W731-D

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## Vic-Strainer Tee Type

### SERIES 730

[Download publication 09.02](#) for complete information

- Lighter than flanged Y-type strainers and provides straight-through flow for lower pressure drop
- Sizes from 1½–12" | DN40–DN300
- Pressures up to 750 psi | 5171 kPa | 52 bar
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.11](#) for information on Series W730

### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## Vic-Strainer Wye Type

### SERIES 732

[Download publication 09.03](#) for complete information

- Provides straight-through flow for lower pressure drop
- Sizes from 2–12" | DN50–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Available in limited sizes for air handling units
- For AGS sizes 14–24" | DN350–DN600, [download publication 20.19](#) for information on Series W732

## Vic™-Header

No. 26

[Download publication 07.11 for complete information](#)

- An outlet header for any mechanical room application
- Available with Victaulic® OGS and AGS grooved ends
- Sizes from  $\frac{3}{4}$ –24" | DN20–DN600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Regional availability, contact [Victaulic](#) for details

## Vibration Isolation Air Handling Unit Drop

SERIES 385

[Download publication 102.15 for complete information](#)

- Provides hook-ups for isolation, straining, balancing and draining
- Swing joint solves misaligned coil challenges
- Single and double supply and return configurations
- Sizes from  $2 \times 2$ " through  $6 \times 4$ " | DN50×DN50 through DN150×DN100
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Regional availability, contact [Victaulic](#) for details

### Certifications/Listings:

[Download publication 02.06](#) for ANSI/NSF Potable Water Approvals/Listings

## Pressure Reducing Valve Station

SERIES 386

[Download publication 102.16 for complete information](#)

- Reduce and control potable water system pressure to specified safe levels, independent of upstream pressure and flow variations
- Six standard configurations to accommodate various system flow rates, pressure reduction ratios, redundancy, and pressure safety options
- Sizes from  $2 \times 1\frac{1}{2}$ " through  $6 \times 2$ " | DN50×DN40 through DN150×DN50
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Regional availability, contact [Victaulic](#) for details

## EndSeal™ System

[Download publication 06.13](#) for the Style HP-70ES coupling [Download publication 07.03](#) for the ES fittings

- For plastic coated pipe or high pressure rigid systems
- Schedule 80 wall thickness for use with HP-70ES couplings
- Coupling sizes from 2–12" | DN50–DN300 and fitting sizes from 2–6" | DN50–DN150
- Pressures up to 2500 psi | 17237 kPa | 172 bar
- Regional availability, contact [Victaulic](#) for details

Certifications/Listings:

## High Pressure Double Grooved Coupling

### STYLE 808

[Download publication 15.01](#) for complete information

- Double-bolted coupling for use with Schedule 80 or heavier steel pipe
- For installation on pipe ends with double cut grooves, [download publication 25.04](#) for complete information
- Sizes from 6–12" | DN150–DN300
- Pressures up to 4000 psi | 27579 kPa | 275 bar
- Regional availability, contact [Victaulic](#) for details

## High Pressure Ring Coupling

### STYLE 809

[Download publication 15.02](#) for complete information

- Double-bolted coupling for use with Schedule 80 or heavier steel pipe
- Coupling engages directly onto restraint rings (supplied with coupling) welded to the O.D. of the pipe
- Sizes from 4–10" | DN100–DN250
- Pressures up to 3000 psi | 20684 kPa | 206 bar
- Regional availability, contact [Victaulic](#) for details

## Composite Flexible Coupling

### STYLE 171

[Download publication 06.22](#) for complete information

- Flexible pipe joint which allows for expansion, contraction and deflection
- For corrosive applications such as reverse osmosis systems
- For use on Victaulic PVC pipe utilizing Victaulic OGS roll or cut groove profile
- Sizes from 1½–4" | DN40–DN100
- Pressures up to 150 psi | 1034 kPa | 10 bar
- For stainless steel and FRP applications, contact Victaulic

## Original Groove System (OGS)

## XL (Extended Life) System for Rubber-lined Abrasive Services

[Download publication 07.07](#) for complete information

- 1½D and 3D elbows designed for ¼" | 6 mm extra lining resulting in up to three times the service life when compared to standard rubber-lined fittings
- Sizes from 3–12" | DN80–DN300
- Style XL77 flexible couplings for pipe-to-fitting connections
- Style XL79 flexible couplings for fitting-to-fitting connections

## Expansion Joint Coupling

### STYLE 152A

[Download publication 09.15](#) for complete information

- Large diameter coupling for pulverized coal/limestone lines with 4° of deflection capability
- Sizes from 10–30" | DN250–DN750, and 780 mm
- Pressures up to 50 psi | 345 kPa | 3 bar
- Regional availability, contact [Victaulic](#) for details

## Coupling for Fiberglass Reinforced Plastic Pipe

STYLE 296-A

[Download publication 90.01](#) for complete information

- Designed to create a rigid pipe joint without any special tools while maintaining existing support requirements
- Can be installed in any weather
- No curing time required
- Sizes from 1–12" | DN25–DN300
- Pressures up to 150 psi | 1034 kPa | 10 bar

## Non-Restrained Flexible Coupling for Fiberglass Reinforced Plastic Pipe

STYLE 229S

[Download publication 60.16](#) for complete information

- Designed for FRP odor control piping systems
- Can be installed in any weather
- No curing time required
- Sizes from 6–54" | DN150–DN1350
- Pressures up to 25 psi | 172 kPa | 1.7 bar

## Advanced Groove System

Victaulic offers a comprehensive portfolio of Advanced Groove System (AGS) couplings for systems 14–78" | DN350–DN1950 and a full range of 14–60" | DN350–DN1500 AGS fittings, valves and accessories. Our large diameter piping solutions provide strength and dependability in addition to speed, making them an excellent choice over welding. Other advantages AGS joints provide over welded joints include no flame installation, superior seismic-shock resistance and a union at every joint for easy adjustment, system maintenance or system expansion.

## AGS Stainless Steel Schedule 10S Fittings

[Download publication 17.05](#) for complete information

- Grooved ends eliminate pipe end preparation for the fittings
- Sizes from 14–24" | DN350–DN600
- Fitting pressure ratings are equivalent to the maximum allowable working pressure (MAWP) of joints installed with Victaulic® AGS couplings
- Offering includes elbows, tees, adapter nipples, caps, eccentric and concentric reducers

## AGS Vic-Flange Adapter

STYLE W741

[Download publication 20.04](#) for complete information

- Designed for directly incorporating flanged components with ANSI Class 125-150 bolt hole patterns
- Sizes from 14–24" | DN350–DN600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For original groove sizes 2–12" | DN50–DN300, [download publication 06.06](#) for information on Style 741

## AGS Expansion Joint

STYLE W155

[Download publication 20.12](#) for complete information

- Combination of Style W77 AGS couplings and short nipples, joined in tandem to provide increased expansion
- Sizes from 14–24" | DN350–DN600
- For original groove sizes ¾–12" | DN20–DN300, [download publication 09.05](#) for information on Style 155

## AGS Expansion Barrel

### STYLE W256

[Download publication 09.16 for complete information](#)

- Provides up to 42" | 1067 mm of in-line movement
- Designed for water and/or slurry services
- Sizes from 24–42" | DN600–DN1050
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Regional availability, contact [Victaulic](#) for details

## AGS Dynamic Movement Joint

### STYLE W257

[Download publication 20.16 for complete information](#)

- Provides up to 4" | 102 mm of dynamic movement including differential settlement, seismic movement, and thermal movement
- Sizes from 14–78" | DN350–DN1950
- Working pressure is equal to the Style W77 coupling on equivalent wall thickness pipe, [download publication 20.03](#) for complete information
- Regional availability, contact [Victaulic](#) for details

## AGS Vic™-300 Butterfly Valve

### SERIES W761

[Download publication 20.06 for complete information](#)

- Offers an easily installed choice to cumbersome, multi-bolt wafer or lug-type flanged valves
- Sizes from 14–24" | DN350–DN600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For original groove sizes 2–12" | DN50–DN300, [download publication 08.20](#) for information on Series 761

#### Certifications/Listings:

[Download publication 10.01](#) for Fire Protection Certifications/Listings

## AGS Vic-Check Double Disc Valve

**SERIES W715**

---

[Download publication 20.08 for complete information](#)

- Utilizes a spring-assisted, double disc design that achieves drip tight sealing
- Can be installed in both horizontal or vertical (flow up) positions
- Sizes from 14–24" | DN350–DN600
- Pressures up to 230 psi | 1586 kPa | 16 bar
- For original groove sizes 2–12" | DN50–DN300, [download publication 08.08](#) for information on Series 716H/716 or [download publication 08.10](#) for information on Series 779

**Certifications/Listings:**

[Download publication 10.01](#) for Fire Protection Certifications/Listings

**AGS Suction Diffuser****SERIES W731-D**

[Download publication 20.20](#) for complete information

- Allows building up at a 90° angle from the pump saving valuable space in the mechanical room while still protecting the pump against cavitation
- Flanges may be machined to match most global (ANSI, DIN, GB, JIS, and AS-E) flange bolt hole patterns within the diffuser pressure rating
- Sizes from 14–24" | DN350–DN600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- For original groove sizes 3–12" | DN80–DN300, [download publication 09.20](#) for information on Series 731-D

## **Victaulic® Bolted Split-Sleeve Products (VBSP)**

Victaulic offers a variety of pipe joining solutions specifically designed to meet the needs of your system.

Conforming to AWWA C227, *Victaulic* Bolted Split-Sleeve couplings are available in a range of unrestrained and restrained flexible designs for use on carbon steel, stainless steel, HDPE and other pipe materials.

*Victaulic* Bolted Split-Sleeve couplings are designed for use on water and wastewater transmission lines as well as hydroelectric penstock lines. VBSP couplings can also provide expansion and contraction capabilities when needed.

## Non-Restrained Flexible Coupling for Fiberglass Reinforced Plastic Pipe

STYLE 229S

[Download publication 60.16 for complete information](#)

- Designed for FRP odor control piping systems
- Can be installed in any weather
- No curing time required
- Sizes from 6–54" | DN150–DN1350
- Pressures up to 25 psi | 172 kPa | 1.7 bar

Certifications/Listings:

[Download publication 02.06 for ANSI/NSF Potable Water Approvals/Listings](#)

## Non-Restrained Flexible Coupling for Carbon Steel Pipe

STYLE 230

[Download publication 60.01 for complete information](#)

- Non-restrained flexible pipe joint for water and wastewater pipelines
- Sizes from 8–144" | DN200–DN3600
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Up to  $\frac{1}{2}$ " | 13 mm intermittent axial movement
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Non-Restrained Flexible Coupling for Stainless Steel Pipe

STYLE 230S

[Download publication 60.02 for complete information](#)

- Non-restrained flexible pipe joint used where corrosion resistance is required
- Sizes from 3–96" | DN80–DN2400
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Up to  $\frac{1}{2}$ " | 13 mm intermittent axial movement
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Non-Restrained Flexible Expansion Coupling for Carbon Steel Pipe

**STYLE 231**

[Download publication 60.03](#) for complete information

- Non-restrained flexible expansion joint provides up to 4" | 102 mm of axial movement
- Sizes from 16–144" | DN400–DN3600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Non-Restrained Flexible Expansion Coupling for Stainless Steel Pipe

**STYLE 231S**

[Download publication 60.04](#) for complete information

- Non-restrained flexible expansion joint provides up to 4" | 102 mm of axial movement
- Sizes from 3–96" | DN80–DN2400
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Restrained Flexible Coupling for Carbon Steel Pipe

**STYLE 232**

[Download publication 60.05](#) for complete information

- Restrained flexible joint for use on water, wastewater, force main and penstock piping
- Sizes from 8–144" | DN200–DN3600
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Satisfies the requirements of AWWA C227

## Restrained Flexible Coupling for Dynamic Joint Deflection on Carbon Steel Pipe

STYLE 233

[Download publication 60.07 for complete information](#)

- Restrained flexible joint that allows for dynamic (in-service) deflection
- Sizes from 8–144" | DN200–DN3600
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Restrained Flexible Coupling for Dynamic Joint Deflection on Stainless Steel Pipe

STYLE 233S

[Download publication 60.08 for complete information](#)

- Restrained flexible joint for use where corrosion resistance is required
- Designed to allow for dynamic (in-service) deflection and thrust restraint at the joint
- Sizes from 3–96" | DN80–DN2400
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Satisfies the requirements of AWWA C227
- Regional availability, contact [Victaulic](#) for details

## Restrained Flexible Single-Gasket Coupling for Carbon Steel Pipe

**STYLE 234**

[Download publication 60.09](#) for complete information

- Designed for use on water transmission, force mains and penstock lines
- Sizes from 8–120" | DN200–DN3000
- Pressures up to 300 psi | 2068 kPa | 21 bar
- Regional availability, contact [Victaulic](#) for details

## Restrained Flexible Single-Gasket Coupling for Stainless Steel Pipe

**STYLE 234S**

[Download publication 60.10](#) for complete information

- Ideal for field joint connections requiring flexibility and thrust restraint
- Sizes from 8–60" | DN200–DN1500
- Pressures up to 200 psi | 1379 kPa | 14 bar
- Regional availability, contact [Victaulic](#) for details

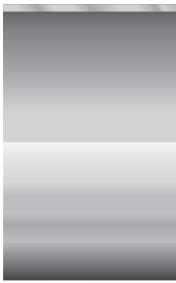

## Stainless Steel Bellow Expansion Joint

### STYLE 240S

[Download publication 60.13 for complete information](#)

- Concurrent axial, angular and/or lateral pipe movement possible
- Lateral offset at pipeline joints
- Designed to job-specific parameters
- Sizes from 3–96" | DN80–DN2400
- Regional availability, contact [Victaulic](#) for details

## Hole Cut System

Victaulic developed the hole cut piping system concept to enable a fast and easy mid-pipe outlet solution that would not require welding. The system allows for a direct branch connection at any location where a hole can be cut in the pipe. Gaskets are molded to conform to the outside diameter of the pipe and are pressure responsive to provide a seal. Victaulic® hole cut products are mounted to the pipe using either a locating collar (Style 920 and 920N) or a toe and heel (Style 923 and 924), and provide a smooth flow area.

- Pressures up to 300 psi | 2068 kPa | 21 bar

**Mechanical-T Spigot Outlet****STYLE 926**[Download publication 11.07 for complete information](#)

- Designed to provide an outlet connection on HDPE, steel, and ductile iron pipe materials in IPS, ISO, and DIPS pipe sizes
- 4" outlets available for 10–32" IPS pipe diameters
- 6" outlets available for 16–48" IPS pipe diameters
- 114.3 mm outlets available for 250–800 mm ISO pipe diameters
- 168.3 mm outlets available for 400–1200 mm ISO pipe diameters

## Plain End System for Carbon Steel

The Victaulic® plain end piping method is ideal for maintenance and repairs as well as new systems such as roof drains, slurries, tailings and oil field services.

Victaulic plain end couplings are primarily designed for use on standard weight steel pipe (Schedule 40), but may be used on light wall steel or other metallic pipe, such as aluminum or stainless steel. They are not intended for use on plastic pipe, plastic-coated pipe or brittle pipe, such as asbestos cement or cast iron. Nor are they intended for use on pipe with a surface hardness greater than 150 Brinell.

## Stainless Steel System

Victaulic offers grooved and pressed systems that provide fast, easy and reliable solutions for joining ANSI and ISO wall thickness stainless steel pipe. Unique Victaulic® roll sets have been designed to achieve maximum performance for a range of pressure ratings for thin wall through the heaviest of schedules in numerous applications.

The revolutionary *Victaulic Vic-Press™* for Schedule 10S system provides quick, easy and safe installation and maintenance for off-the-shelf ASTM A-312 stainless steel pipe. It has the integrity to stand up to the demands of industrial applications by providing a positive mechanical interlock between the pipe and the fitting.

The *Victaulic StrengThin™* system, ideally suited for high pressure SWRO applications, delivers weld-like load carrying capabilities on thin wall stainless steel pipe. The system accommodates pressures up to 1200 psi |

8274 kPa | 83 bar, and is designed with duplex stainless steel to provide corrosion resistance. The system, consisting of couplings, fittings and valves, is specifically designed for use on Victaulic's proprietary *StrengThin* groove profile, and is available in 2–24" | DN50–DN600.

The *Victaulic StrengThin* 100 system is specifically designed to perform up to 232 psi | 1600 kPa | 16 bar on thin wall Type 304/316 stainless steel pipe. Exclusively for use with couplings, fittings, valves, accessories and pipe which feature ends formed with Victaulic's proprietary *StrengThin* 100 groove profile, the system is available in sizes 2–12" | DN50–DN300, and it eliminates the need for pickling or passivating the joint and for a fire watch.

## Vic™-300 MasterSeal™ Stainless Steel Butterfly Valve SERIES 461

[Download publication 17.40 for complete information](#)

- Designed for bi-directional, dead end services to full working pressure
- Available without handle, with gear operator, with lever lock handle and memory stop, or with 10-position handle and memory stop
- Designed for use with fittings and couplings featuring Victaulic® Original Groove System (OGS) grooved ends for fast installation
- Sizes from 2–8" | DN50–DN200
- Pressures up to 300 psi | 2068 kPa | 21 bar

## Stainless Steel Check Valve

## SERIES 416

[Download publication 17.41 for complete information](#)

- Resilient-seat spring return swing check valve designed for horizontal or vertical (upward flow) applications
- Designed for use with fittings and couplings featuring Victaulic Original Groove System (OGS) grooved ends for fast installation
- Sizes from 2–12" | DN50–DN300
- Pressures up to 300 psi | 2068 kPa | 21 bar

## Stainless Steel Swing Check Valve

## SERIES 712S

[Download publication 17.08 for complete information](#)

- The large closure access bonnet permits easy access for in-line service
- Designed for use with fittings and couplings featuring Victaulic Original Groove System (OGS) grooved ends for fast installation on inlet and outlet ports
- Available in size 2" | DN50
- Pressures up to 300 psi | 2068 kPa | 21 bar

## **Stainless Steel System**

### **Duplex Double Disc Check Valve**

#### **SERIES 415**

[Download publication 17.37](#) for complete information

- Designed for use with pipe which features ends formed with either Victaulic's proprietary StrengThin™ groove profile or the Victaulic® Original Groove System (OGS) profile, specify when ordering
- Sizes from 2–18" | DN50–DN450
- Pressures up to 1200 psi | 8274 kPa | 83 bar

- The three-piece swing-out design permits easy in-line maintenance
- Quarter-turn, bubble-tight shut-off valve, available in three end configurations: Press x Press, Groove x Press and Groove x Groove
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Pressures up to 400 psi | 2758 kPa | 28 bar
- For the entire Vic-Press™ line of products, see pgs. 59 and 60

**Duplex Plug Valve****SERIES 465**[Download publication 17.36](#) for complete information

- Typically used in reverse osmosis desalination plants for on/off and control services
- Available without operator or with manual, pneumatic, hydraulic and electric actuators
- Available for use with pipe which features ends formed with either Victaulic's proprietary *StrengThin™* groove profile or the Victaulic® Original Groove System (OGS) profile, specify when ordering
- Sizes from 2–20" | DN50–DN500
- Pressures up to 1450 psi | 9997 kPa | 100 bar

**Duplex Plug Valve****SERIES 466**[Download publication 17.39](#) for complete information

- Typically used in reverse osmosis desalination plants for on/off and control services or in submerged applications
- Available for use with pipe which features ends formed with either the Victaulic's proprietary *StrengThin* groove profile or the *Victaulic* Original Groove System (OGS) profile, specify when ordering
- Sizes from 10–24" | DN250–DN600
- Pressures up to 1200 psi | 8274 kPa | 83 bar

- Sizes from 2–12" | DN50–DN300
- Style E155 expansion joints are rated to the working pressure of the coupling used
- Regional availability, contact [Victaulic](#) for details

## Copper System

The Victaulic® grooved copper system offers a full line of couplings, fittings and valves for systems rated up to 300 psi | 2068 kPa | 21 bar, as well as a line of roll grooving tools for on-site grooving. The *Victaulic* grooved copper system is cold-formed, eliminating the need for soldering or brazing. The copper connection system joins 2–8" | 54.0–206.4 mm | DN50–DN200 of the following types of copper tube:

- CTS: Types K, L, M or DWV
- AS: Types A, B or D
- EN 1057: R250

## Ductile Iron System

The Victaulic® grooved ductile iron piping system is the fastest and easiest method for joining ductile iron pipe with 75% fewer bolts than flanging. *Victaulic* grooved piping components are available for use on AWWA C-606 class 53 pipe or heavier, and have a pressure rating of up to 500 psi | 3447 kPa | 34 bar, with a size range from 3–36" | DN80–DN900. Flush-Seal™ gaskets are specifically designed to seal on ductile iron pipe surfaces providing a triple seal to promote leak-free service for the life of the system.

## Coupling for Ductile Iron

**STYLE 31**[Download publication 23.02 for complete information](#)

- Provides a rigid or flexible joint on Class 53 or heavier wall pipe
- Sizes from 3–36" | DN80–DN900
- Pressures up to 500 psi | 3447 kPa | 34 bar
- Optional coatings include orange enamel, coal tar epoxy, organic zinc primer and bituminous
- Regional availability, contact [Victaulic](#) for details

## Transition Coupling for IPS to Ductile Iron

**STYLE 307**[Download publication 23.03 for complete information](#)

- Single transition for connecting grooved end IPS steel to grooved end ductile iron
- Sizes from 3–12" | DN80–DN300
- Pressures up to 500 psi | 3447 kPa | 34 bar
- Optional coatings include galvanized, organic zinc primer and bituminous
- Regional availability, contact [Victaulic](#) for details

## Vic-Flange Adapter for Ductile Iron

**STYLE 341**[Download publication 23.04 for complete information](#)

- Designed for direct connection of flanged components into a grooved cast or ductile system
- Sizes from 3–24" | DN80–DN600
- Pressures up to 250 psi | 1724 kPa | 17 bar
- Optional coatings include coal tar epoxy, organic zinc primer and bituminous
- Regional availability, contact [Victaulic](#) for details

## Check Valve for Ductile Iron

### SERIES 317

[Download publication 23.09](#) for complete information

- Conforms to AWWA C-508 requirements for water and wastewater treatment services
- Sizes from 3–12" | DN80–DN300
- Pressures up to 175 psi | 1207 kPa | 12 bar
- Regional availability, contact [Victaulic](#) for details

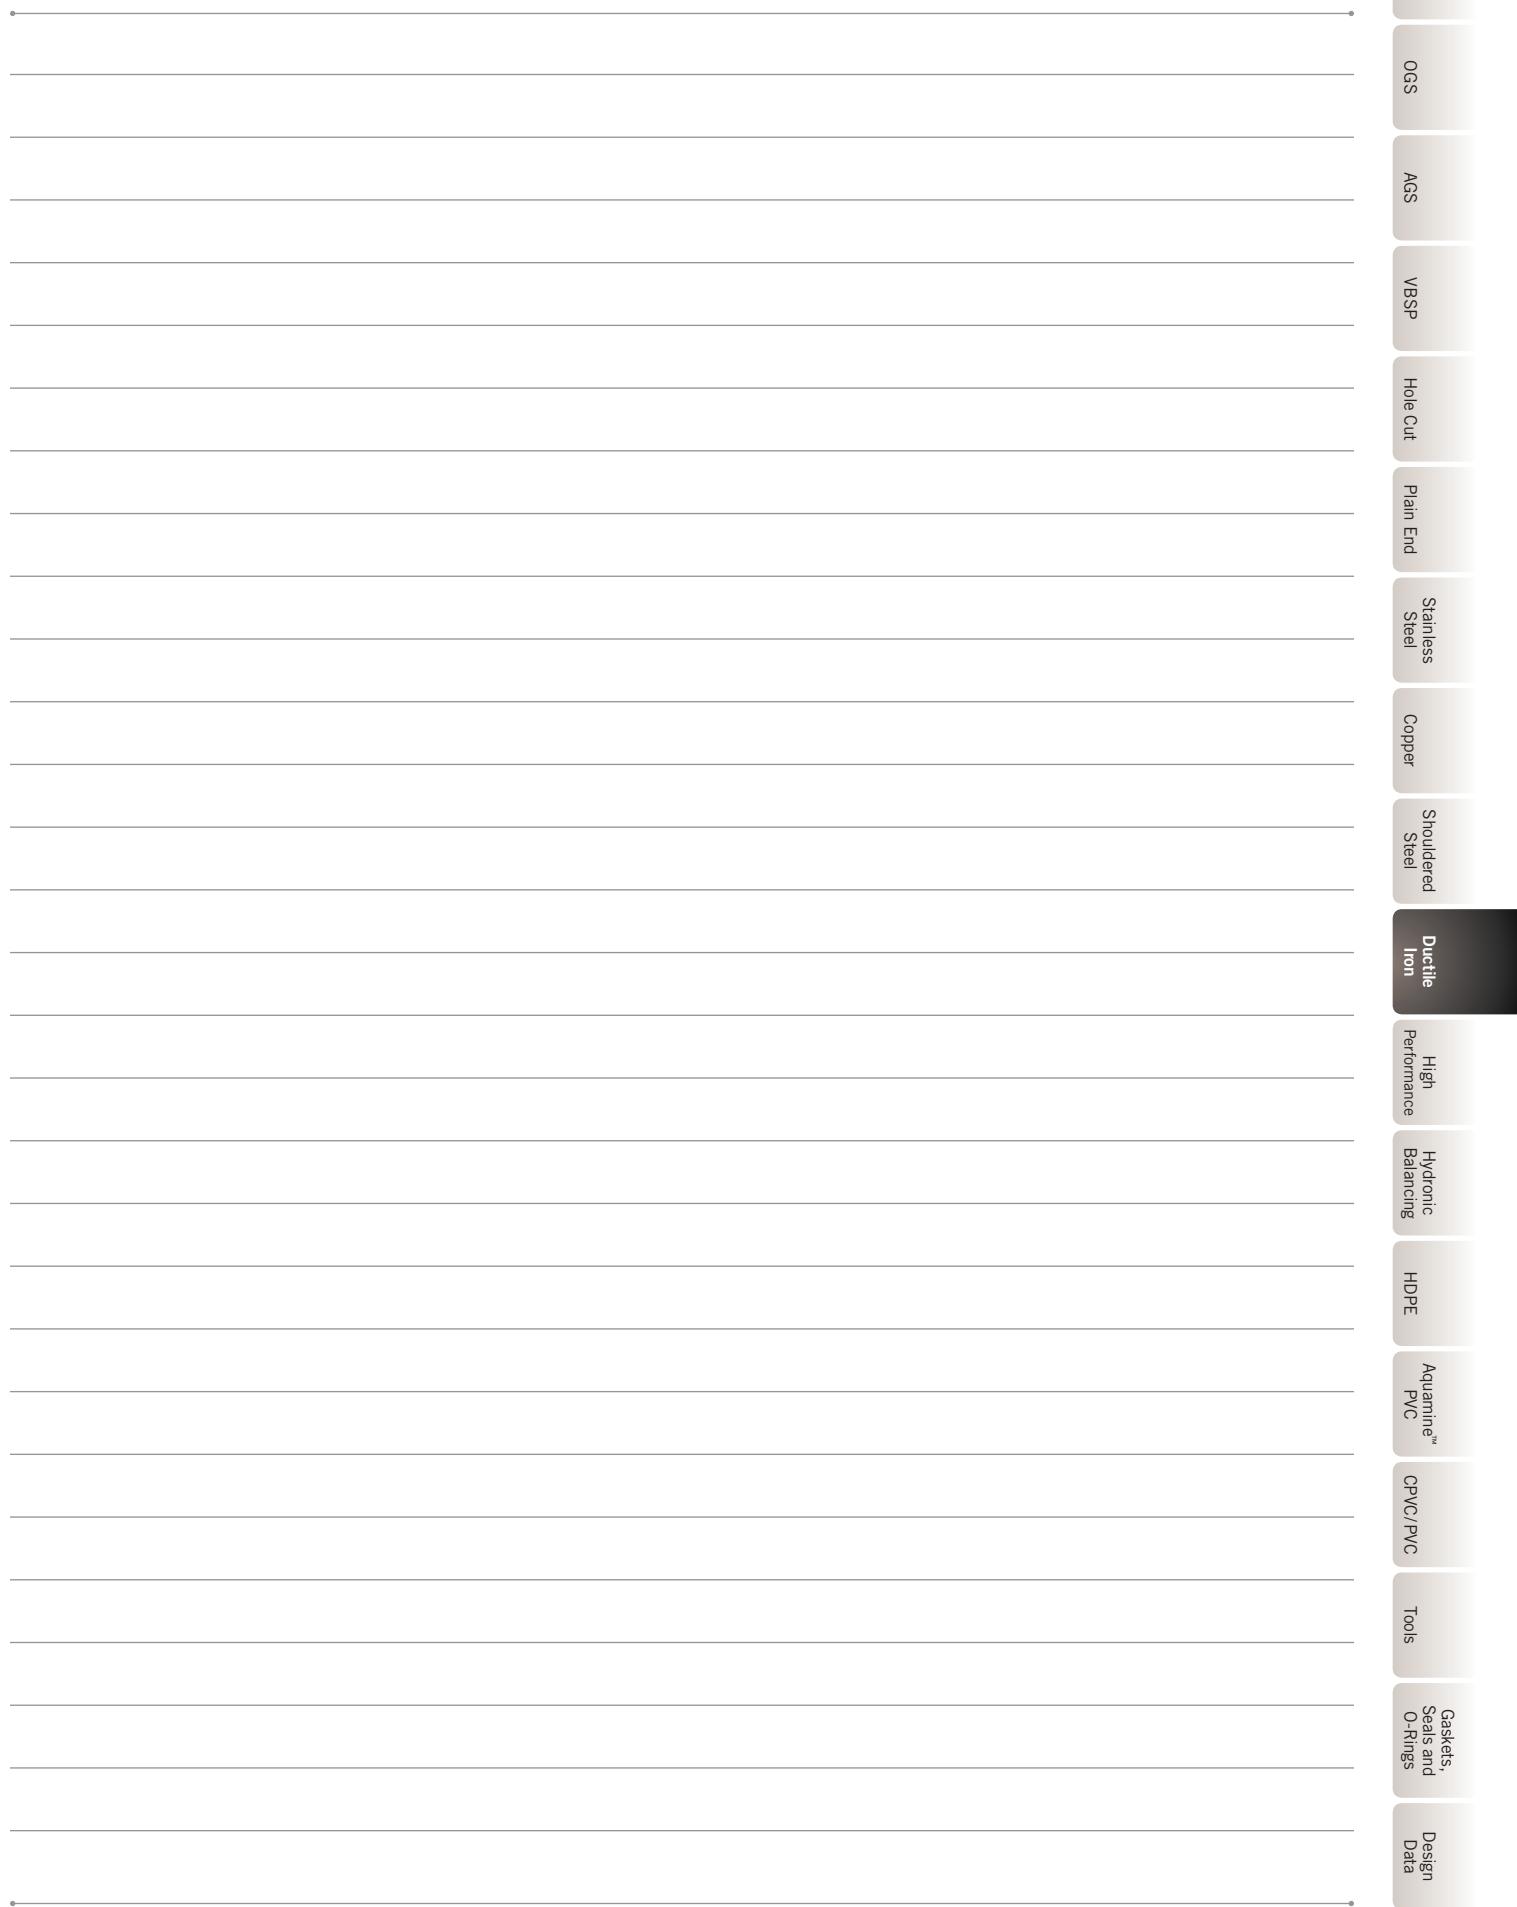

## Vic-Plug Valve for Ductile Iron

### SERIES 365

[Download publication 23.06](#) for complete information

- Conforms to AWWA C-509 standard for end-to-end dimensions
- Round port provides better flow and allows easier passage of cleaning pigs
- Sizes from 3–12" | DN80–DN300
- Pressures up to 175 psi | 1207 kPa | 12 bar
- Regional availability, contact [Victaulic](#) for details

## High Performance System for Steam and Chemical Services

Victaulic has expanded its product line to include the industry's first grooved mechanical piping solution designed for use on commercial and industrial steam, condensate and chemical service piping. Available in sizes 2–8" | DN50–DN200, the system includes the Style 870 rigid coupling, the Series 871 gate valve, the Series 159 flexible loop, a full line of fittings, the RG1200 in-place roll grooving tool, and pipe preparation tool roll sets that eliminate the need to weld steam systems up to 200 psi | 1379 kPa | 14 bar.

## High Performance Rigid Coupling for Steam and Chemical Services STYLE 870

[Download publication 100.02 for complete information](#)

- Excellent chemical resistance
- Exclusively for use on pipe which features ends formed with Victaulic's proprietary OGS-200 groove profile
- Sizes from 2–8" | DN50–DN200
- Saturated steam: Pressures up to 200 psi | 1379 kPa | 14 bar
- Nonsteam: Full vacuum up to 740 psi | 5102 kPa | 51 bar
- -20°F to +388°F | -29°C to +198°C
- Regional availability, contact **Victaulic** for details

## OGS-200 Grooved End Fittings

[Download publication 100.01](#) for complete information

- 90° and 45° elbows, tees and reducing tees, caps, reducers and flange adapter nipples available
- Exclusively for use on pipe which features ends formed with Victaulic's proprietary OGS-200 groove profile
- Sizes from 2–8" | DN50–DN200
- Pressure ratings are equivalent to the Victaulic coupling used to install them
- Regional availability, contact [Victaulic](#) for details

## Gate Valve

### SERIES 871

[Download publication 100.12](#) for complete information

- Bi-directional shut off service
- Meets API 600 and API 598 requirements
- Exclusively for use on pipe which features ends formed with Victaulic's proprietary OGS-200 groove profile
- Sizes from 2–8" | DN50–DN200
- Saturated steam and nonsteam: Pressures up to 200 psi | 1379 kPa | 14 bar
- +32°F to +388°F | 0°C to +198°C
- Regional availability, contact [Victaulic](#) for details

## Flexible Loop

### SERIES 159

[Download publication 100.13](#) for complete information

- Accommodates piping movement from thermal changes, seismic activity, and differential building settlement
- Exclusively for use on pipe which features ends formed with Victaulic's proprietary OGS-200 groove profile
- Sizes from 2–8" | DN50–DN200
- Saturated steam and nonsteam: Pressures up to 150 psi | 1034 kPa | 10 bar
- +32°F to +366°F | 0°C to +186°C
- Regional availability, contact [Victaulic](#) for details

## Hydronic Balancing Solutions

Victaulic provides balancing products that allow contractors to improve productivity on the job site and engineers to accurately control building temperatures while optimizing energy efficiency. Balancing valves enhance comfort and cut energy costs through precise control of building temperature. Victaulic® KOIL-KIT™ Coil Packs provide a coil solution delivered to the job site as a pre-connected unit for faster and easier installation.

## Terminal Balancing and Control Valve—Female × Female

### TA SERIES TC

[Download publication 08.38](#) for complete information

- Designed for on/off control
- Ensures accurate hydronic control and optimum throughput over a long lifetime
- Sizes from  $\frac{1}{2}$ –1" | DN15–DN25
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Rated from -4°F to +250°F | -20°C to +120°C
- Regional availability, contact [Victaulic](#) for details

## Terminal Balancing Valve for Modulating Control—Female × Female

### TA SERIES TCM

[Download publication 08.38](#) for complete information

- Designed for modulating control or on/off
- Ensures accurate hydronic control and optimum throughput over a long lifetime
- Sizes from  $\frac{1}{2}$ –1" | DN15–DN25
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Rated from -4°F to +250°F | -20°C to +120°C
- Regional availability, contact [Victaulic](#) for details

## Combined Balancing and Control Valve—Thread x Thread

### TA SERIES 7FC

[Download publication 08.52](#) for complete information

- Measures flow, differential pressure, temperature and pump head
- EQM characteristics (Equal Percentage Modified)
- 1½–2" | DN32–DN50: Female NPT Threads; Pressures up to 230 psi | 1586 kPa | 16 bar
- 2½–6" | 73.0 mm–DN150: ANSI Class 150 Flange; Pressures up to 365 psi | 2517 kPa | 25 bar
- Rated from -4°F to +250°F | -20°C to +120°C
- Regional availability, contact [Victaulic](#) for details

## Pressure Independent Balancing and Control Valve (PIBCV)

### TA SERIES 7FP

[Download publication 08.53](#) for complete information

- Measures flow, differential pressure, temperature and pump head
- EQM characteristics (Equal Percentage Modified)
- 1½–2" | DN32–DN50: Female NPT Threads; Pressures up to 230 psi | 1586 kPa | 16 bar
- 2½–6" | 73.0 mm–DN150: ANSI Class 150 Flange; Pressures up to 365 psi | 2517 kPa | 25 bar
- Rated from -4°F to +250°F | -20°C to +120°C
- Regional availability, contact [Victaulic](#) for details

## Compact Pressure Independent Balancing and Control Valve

TA SERIES 7CP

[Download publication 08.37](#) for complete information

- Lower pump head/energy consumption
- Sizes from  $\frac{1}{2}$ – $1\frac{1}{4}$ " | DN15–DN32
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Rated from +32°F to +194°F | +0°C to +90°C
- Regional availability, contact [Victaulic](#) for details

## Pressure Independent Balancing and Modulating Control Valve

TA SERIES 7MP

[Download publication 08.55](#) for complete information

- EQM flow characteristics provide highly precise temperature control
- Sizes from  $\frac{1}{2}$ –3" | DN15–DN80
- Pressures up to 365 psi | 2517 kPa | 25 bar
- Rated from +32°F to +194°F | +0°C to +90°C
- Regional availability, contact [Victaulic](#) for details

## Control Valve with Return Temperature Controller

TA SERIES 7CT

[Download publication 08.36](#) for complete information

- Lower pump head/energy consumption
- Sizes from  $\frac{1}{2}$ –1" | DN15–DN25
- Pressures up to 230 psi | 1586 kPa | 16 bar
- Rated from +14°F to +122°F | -10°C to +50°C
- Regional availability, contact [Victaulic](#) for details

## Differential Pressure Controller—Female Threaded End

TA SERIES 793

[Download publication 08.29](#) for complete information

- Features AMETAL® body providing dielectric protection
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Capable of stabilizing differential pressures up to 23.3 psi | 160 kPa | 1.6 bar
- Regional availability, contact [Victaulic](#) for details

## Differential Pressure Controller—Flanged End

TA SERIES 794

[Download publication 08.29](#) for complete information

- Features a ductile iron body
- Sizes from  $2\frac{1}{2}$ –4" | 73.0 mm–DN100
- Capable of stabilizing differential pressures up to 23.3 psi | 160 kPa | 1.6 bar
- Regional availability, contact [Victaulic](#) for details

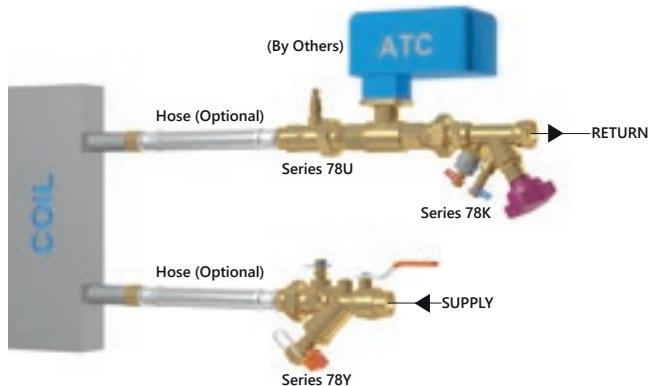

## Differential Pressure Controller—Flanged End

TA Series 7PR

[Download publication 08.46](#) for complete information

- Features a ductile iron valve body and a non-ferrous AMETAL® DZR brass copper alloy pilot body
- Sizes from  $2\frac{1}{2}$ –8" | 73.0 mm–DN200
- Capable of stabilizing differential pressures up to 116 psi | 800 kPa | 8 bar
- Rated from -4°F to +250°F | -20°C to +120°C
- Regional availability, contact [Victaulic](#) for details

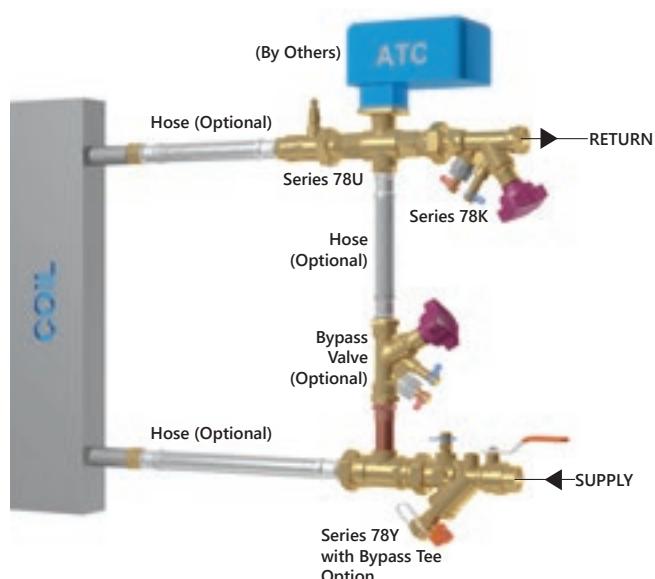

## Standard KOIL-KIT™ Coil Pack

### SERIES 799

[Download publication 08.30 for complete information](#)

- The Series 799 consists of the following components: a Series 78Y Y-strainer/ball valve or Series 78T ball valve union combination; a Series 78U union port fitting; and a Series 78K, Series 786 (sweat) or Series 78BL balancing valve; with or without hoses; and with or without PT and handle extensions
- Suitable for a variety of hot and cold water applications including treated and untreated water systems
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Coil Pack with ATC and Bypass Options

### SERIES 79B and SERIES 79A

[Download publication 08.30 for complete information](#)

- The Series 79B consists of the following components: Series 78Y Y-strainer/ball valve or Series 78T ball valve union combination, two coil hoses, a Series 78U union port fitting, and a balancing valve as well as various options for bypass valves
- The Series 79A includes option to have the ATC valve of your choice assembled and shipped with the Victaulic® KOIL-KIT coil pack
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Coil Pack for Air Handling Units

SERIES 79C and SERIES 79D

[Download publication 08.35 for complete information](#)

- The Series 79C consists of the following components: Series 732 strainer with a blow down drain valve and a balancing valve
- The Series 79D includes the option of adding a Style 925 drain/air vent assembly included with the Victaulic® KOIL-KIT™ coil pack
- The Style 925 is provided with a Style 107 QuickVic™ rigid coupling which is used for connecting the Style 925 to the balancing valve
- Sizes from 2½–6" | 73.0 mm–DN300
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Coil Hose

[Download publication 08.30 for complete information](#)

- Stainless steel braided hose and an EPDM polymer core with stainless ferrules; available as male by female swivel and male by male swivel
- Available lengths:  
12" | 300 mm; 24" | 610 mm; 36" | 914 mm
- Sizes from ½–2" | DN15–DN50
- 375 psi | 2585 kPa | 26 bar maximum CWP (varies by size)
- Suitable for operating temperatures up to +230°F | +110°C
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Y-Strainer/Ball Valve Combination SERIES 78Y

[Download publication 08.30 for complete information](#)

- DZR brass body consisting of a full port valve, strainer and blow down valve with flow measuring ports
- Multiple end connections available
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Rated up to +230°F | +110°C
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Ball Valve/Union Combination SERIES 78T

[Download publication 08.30 for complete information](#)

- DZR brass body consisting of a union and blow down valve with flow measuring ports
- Multiple end connections available
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Rated up to +230°F | +110°C
- Regional availability, contact [Victaulic](#) for details

## KOIL-KIT™ Union Port Fitting SERIES 78U

[Download publication 08.30 for complete information](#)

- Multiple end connections available
- Sizes from  $\frac{1}{2}$ –2" | DN15–DN50
- Pressures up to 400 psi | 2758 kPa | 28 bar
- Rated up to +230°F | +110°C
- Regional availability, contact [Victaulic](#) for details

## CMI Pressure Differential Meter

### TA SERIES 73M

[Download publication 08.16 for complete information](#)

- A handheld instrument for measuring differential pressure, temperature and flow through balancing valves in hydronic systems
- Consists of a sensor unit and an instrument unit programmed with the TA valve characteristics, which makes it possible to take a direct reading of flow and differential pressure
- Regional availability, contact [Victaulic](#) for details

## TA Scope™

### TA SERIES 734

[Download publication 08.16 for complete information](#)

- A wireless, handheld device for the swift and accurate measurement of differential pressure, flow, temperature and power
- An independent sensor communicates with the TA Scope™ to deliver data quickly, thereby enabling contractors to balance a system, troubleshoot hydronic problems and log system performance
- Used in conjunction with HySelect computer program to obtain the most economical system design
- Regional availability, contact [Victaulic](#) for details

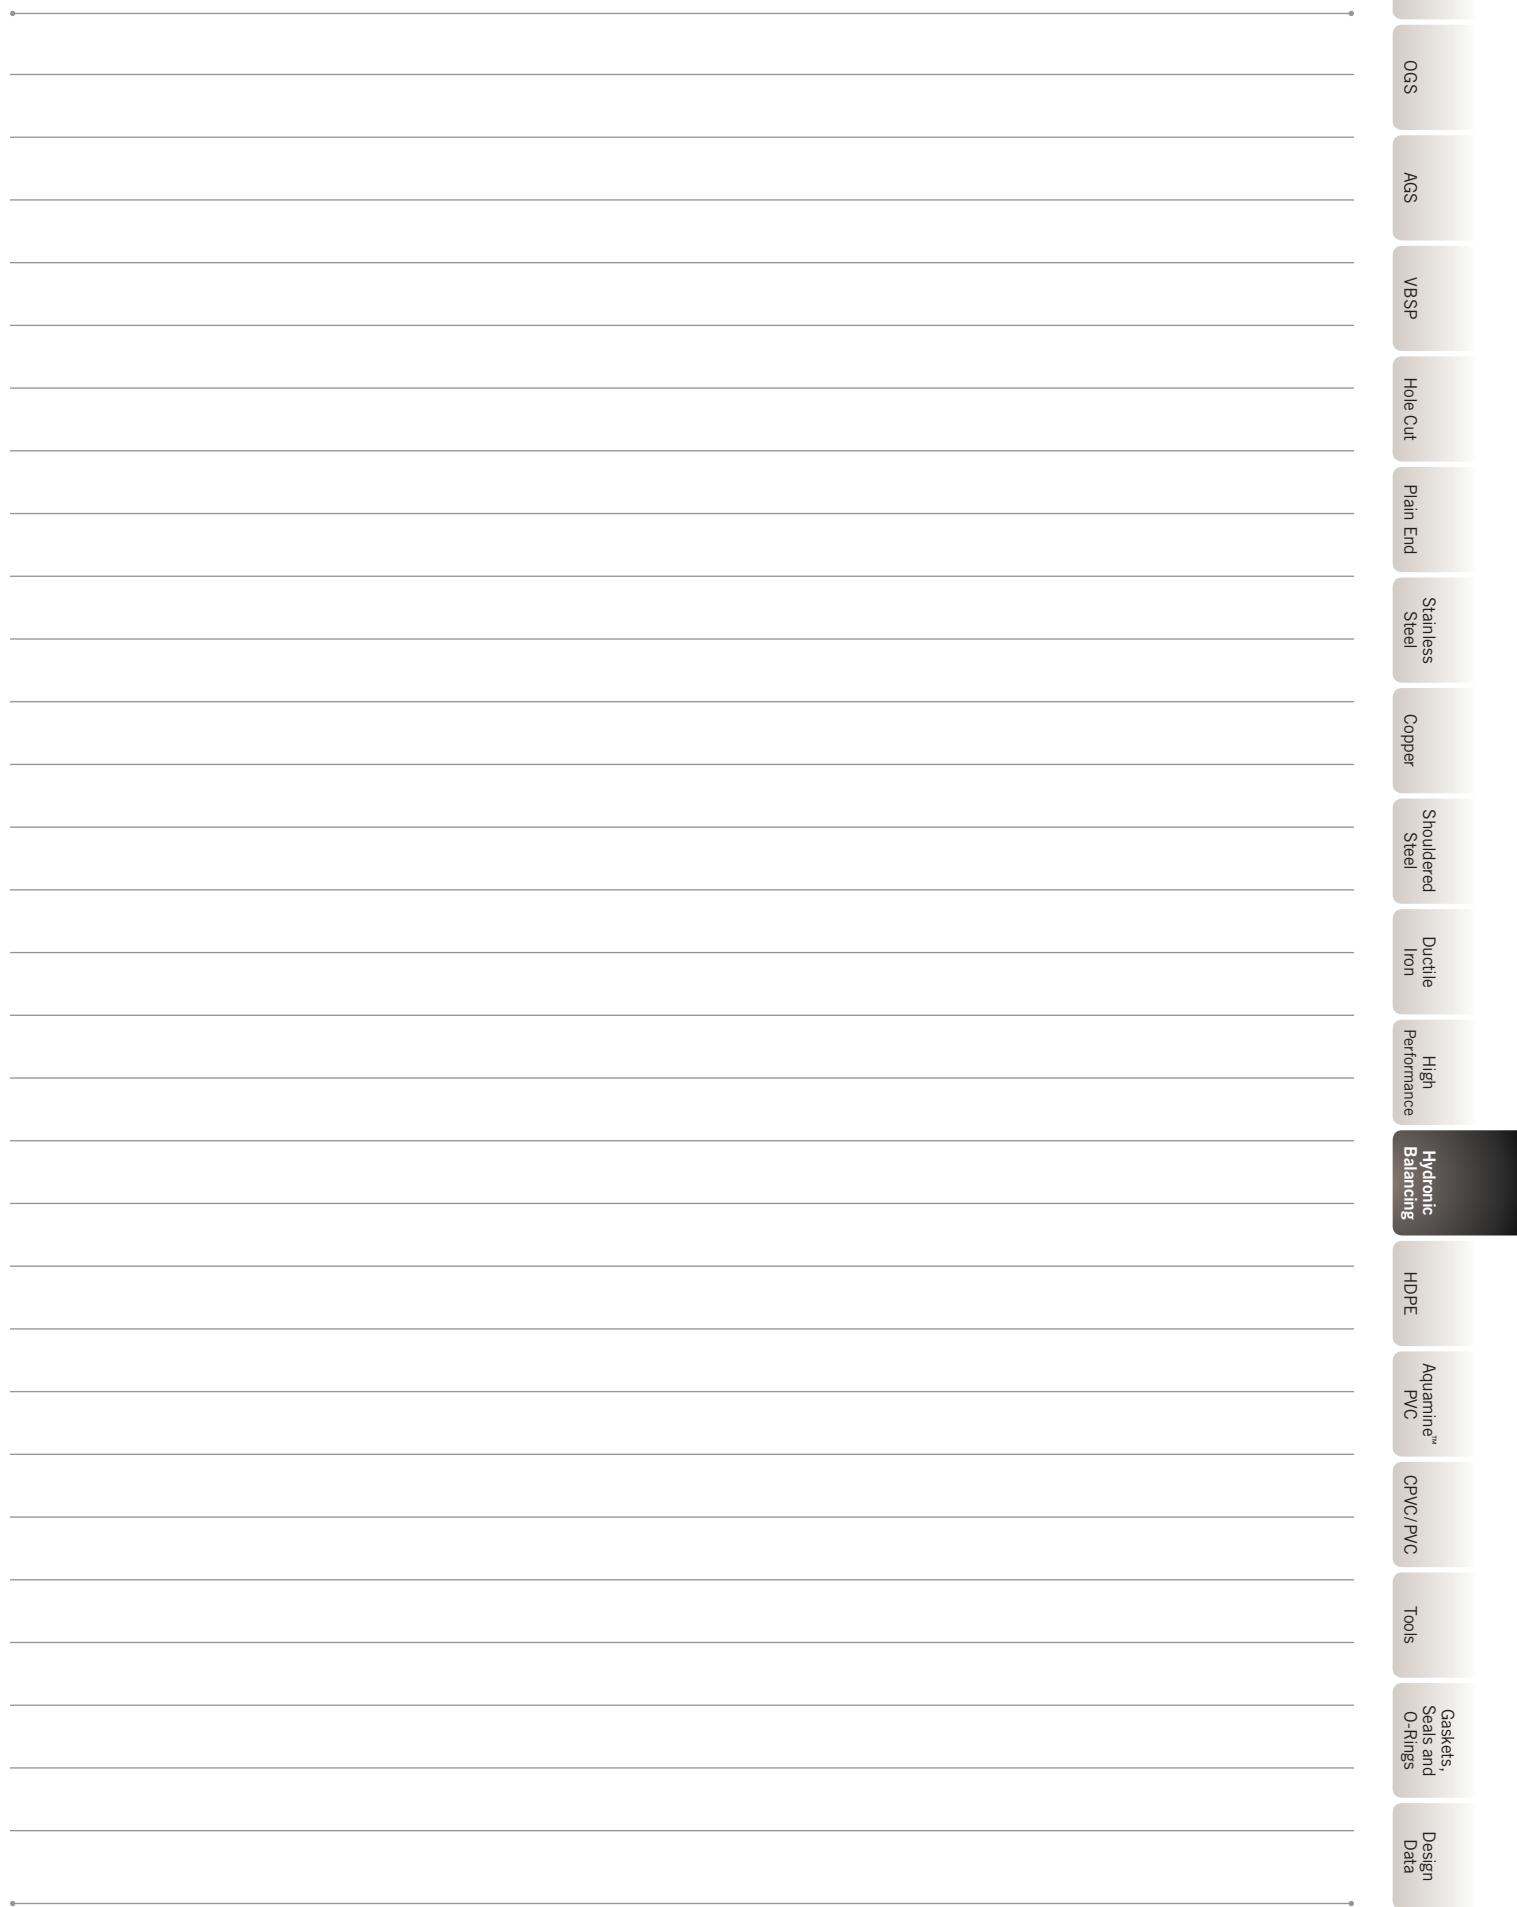

## Link Differential Pressure Sensor

### TA SERIES 736

[Download publication 08.16 for complete information](#)

- Provides connection between a building's heating and cooling and the building's monitoring system (BMS)
- Continuously measures the flow and differential pressure through and across the IMI TA balancing valves
- Measurement probes provided for direct connection to the measurement points on all TA Series 786, 787, 788, and 789 balancing valves
- Regional availability, contact [Victaulic](#) for details

## Refuse-to-Fuse™ System for HDPE Pipe

Strong, durable, and easy to install, the Victaulic® Refuse-to-Fuse mechanical joining system for high-density polyethylene (HDPE) offers a complete line of Installation-Ready™ plain end and grooved solutions. Installation is up to ten times faster than fusion, weather agnostic, and requires only simple tools. Refuse-to-Fuse couplings can be buried or submerged, boast pressure ratings that meet or exceed pressure ratings of HDPE pipe, and offer visual verification of proper joint assembly.

- Designed for plain end HDPE pipe (SDR 7–SDR 21)
- Utilizes patented Installation-Ready™ technology to eliminate loose parts
- Sizes from 2–8" IPS and 63–225mm ISO
- Pressure rating meets or exceeds the performance capabilities of the pipe

**Refuse-to-Fuse™ Transition Coupling for HDPE-to-Steel Pipe****STYLE 907**[Download publication 19.10](#) for complete information

- Designed to provide a single transition from plain end HDPE pipe (SDR 7–SDR 21) to grooved steel sized piping system components
- Utilizes patented *Installation-Ready* technology to eliminate loose parts
- Sizes from 2–8" IPS HDPE to 2–8" IPS grooved steel
- Sizes from 63–225 mm ISO HDPE to 2–8" | DN50–DN200 ISO grooved steel
- Pressure rating meets or exceeds the performance capability of the pipe

**Refuse-to-Fuse™ Coupling for Double-Grooved HDPE Pipe****STYLE 908**[Download publication 19.09](#) for complete information

- Designed for double-grooved HDPE (SDR 7–SDR 21)
- Sizes from 8–36" IPS and 250–900 mm ISO
- Standard Victaulic® coupling assembly procedure used for installation

## Refuse-to-Fuse™ System for HDPE Pipe

## Refuse-to-Fuse™ Flange Adapter for HDPE-to-Flanged Pipe STYLE 904

[Download publication 19.12](#) for complete information

- Designed to provide a single transition from plain end HDPE pipe to flanged piping system components
- Utilizes patented Installation-Ready™ technology to eliminate loose parts

## Refuse-to-Fuse™ Knife Gate Valve for HDPE Pipe SERIES 906

[Download publication 19.06](#) for complete information

- Designed for fluid lines containing solids, slurry, and/or abrasive media
- All wear parts can be replaced in-line without removing the valve from the pipeline
- Utilizes *Installation-Ready* technology to eliminate loose parts
- Manual, hydraulic, pneumatic, and electric actuation available
- Sizes from 3–8"
- Pressures up to 150 psi | 1035 kPa | 10 bar

## Aquamine™ PVC System

Victaulic® Aquamine reusable PVC piping system offers a complete line of reusable pipe, fittings, valves and specialty items. This product line is ideal for a wide variety of water and chemical services due to the high-impact resistance of *Aquamine* PVC pipe and synthetic rubber O-rings. The spline assembly used in *Victaulic* *Aquamine* PVC piping uniquely engages into the grooves of both the coupling and the pipe. The thickened pipe end provides joint reinforcement and security.

- Pressures up to 250 psi | 1724 kPa | 17 bar

## CPVC/PVC System

Victaulic now offers the industry's first and only grooved piping system designed exclusively for use on Schedules 40 and 80 chlorinated polyvinyl chloride/polyvinyl chloride (CPVC/PVC) pipe featuring Victaulic's proprietary PGS-300 groove profile. Available in sizes 2–12" | DN50–DN300, the system includes a full line of Installation-Ready™ couplings, fittings and pipe preparation tools. This system solution offers the fastest, cleanest installation method for CPVC/PVC pipe and eliminates several drawbacks associated with traditional joining methods.

## Pipe Preparation Tools

The world's leading developer of pipe preparation tools, and inventor of the original groove, has been providing the industry with in-place, field and shop model tools since the 1940s. From  $\frac{1}{2}$ " | DN15 through 78" | DN1950; for carbon steel through plastic pipe; and a wide variety of accessories, these tools will simplify your work in the field or on the shop floor. Our line of intelligent roll grooving tools offer instant feedback on the quality of the groove, reducing rework and increasing operator safety.

### VE12 GROOVE IN-PLACE

[Download publication 24.01](#) for complete information

- Roll grooves  $\frac{3}{4}$ –2" | DN20–DN50 pipe
- For manual grooving of Schedule 5, 10 and 40 steel; stainless steel; aluminum and PVC pipe (size dependent)
- Tool is manually operated using the supplied handle
- Enhanced tracking rolls allow bi-directional grooving
- Power Requirements: None
- Weight: 17 lbs. | 8kg

## Field Portable Roll Grooving Tools

### RG1200 OGS-200 GROOVE IN-PLACE

[Download publication 24.11](#) for complete information

- Roll grooves 2–6" | DN50–DN150 pipe
- Designed to provide a Victaulic® OGS-200 roll groove in Schedules 40 and 80 carbon steel pipe
- Tool is manually operated using the supplied handle
- Enhanced tracking rolls allow bi-directional grooving
- Power Requirements: None
- Weight: 27 lbs. | 12kg

## Field Portable Roll Grooving Tools

### VE26 GROOVE IN-PLACE

[Download publication 24.01 for complete information](#)

- Roll grooves 2–6" | DN50–DN150 pipe
- For manual grooving of Schedule 5, 10 and 40 steel; stainless steel; aluminum and PVC pipe; K, L, M, DWV, A, B and D copper tube (size dependent)
- Tool is manually operated using the supplied handle
- Enhanced tracking rolls allow bi-directional grooving
- Optional power drive kit available to alternately groove pipe using a Ridgid™ 300 power drive. Newer tools with serial numbers ending in "C" are compatible with the Power Drive Kit; tools which do not contain the "C" suffix will require retrofit to accept the Power Drive Kit; contact Victaulic for details.
- Power Requirements: None
- Tool Weight: 22 lbs. | 10 kg  
Optional Power Drive Kit Weight: 7 lbs. | 3 kg

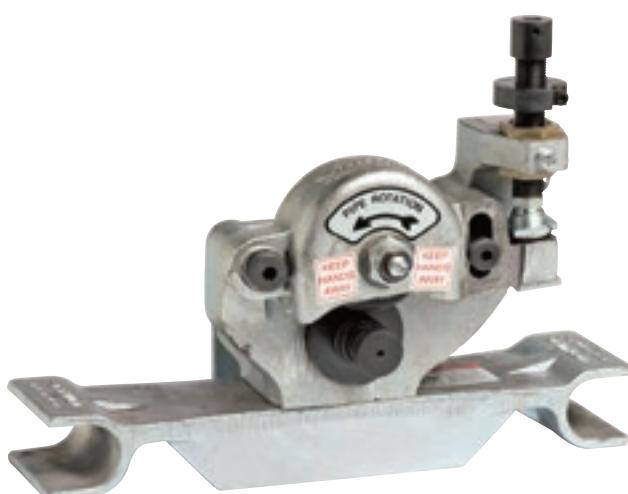

## Field Portable Roll Grooving Tools

[Download publication 24.01](#) for complete information

- Roll grooves  $\frac{3}{4}$ –6" | DN20–DN150 pipe
- For grooving of Schedule 5, 10 and 40 steel; stainless steel; aluminum and PVC pipe; K, L, M, DWV, A, B and D copper tube (size dependent)
- Tool is operated using a standard  $\frac{3}{8}$ " | 9.5 mm square ratchet drive (not included)
- Drive Requirements: Mounts to Ridgid™ 300 Power Drive; optional bases available
- Kit for connecting a VE226 roll grooving tool to a Ridgid™ 700 Power Drive
- Tool Weight: 37 lbs. | 17 kg  
Optional Power Drive Kit Weight: 75 lbs. | 34 kg

## Field Portable Roll Grooving Tools

### RG3600 StrengThin™ 100 Portable Groover

[Download publication 24.08](#) for complete information

- Roll grooves 2–12" | DN50–DN300 1.4301/1.4307 (Type 304/304L) or 1.4401/1.4404 (Type 316/316L) stainless steel pipe per EN 10217-7; 2–6" | DN50–DN150, 1.6–2.7 mm wall thickness and 8–12" | DN200–DN300, 2.0–4.5 mm wall thickness
- Drive Requirements: Compatible with REMS Amigo 2 and Ridgid™ 700 power drive
- Power Requirements: 230 VAC 50/60 hertz
- Optional tripod stand kit available
- Tool Weight: 29 lbs. | 55 kg
- Regional availability, contact [Victaulic](#) for details

## Field Fabrication Roll Grooving Tools

### VE106/VE107 GROOVE-N-GO

[Download publication 24.01 for complete information](#)

- Roll grooves 1½–6" | DN32–DN150 pipe
- For grooving of Schedule 5, 10 and 40 steel and stainless steel pipe; K, L, M and DWV copper tube (size dependent)
- Mobile light-duty roll grooving tool with an integral motor/drive unit mounted to portable hand truck
- Reduces pipe handling by allowing the tool to be wheeled directly to the pipe preparation site
- ¾" | 9.5 mm square ratchet drive for operation (standard)
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- Completely self-contained unit with an integral motor, safety foot switch and power plug
- Power Requirements:  
VE106 is provided with 110 volt, 15 amp power;  
VE107 is provided with 220 volt, 6amp power
- Weight: 140 lbs. | 64 kg

## Field Fabrication Roll Grooving Tools

### STYLE VE206

[Download publication 24.01](#) for complete information

- Roll grooves  $1\frac{1}{4}$ – $6"$  | DN32–DN150
- For grooving of Schedule 5, 10 and 40 steel and stainless steel pipe; K, L, M and DWV copper tube (size dependent)
- Tool head mounts to any tripod stand with a Ridgid™ 300 bolt pattern or the flat bed of a work truck
- Hydraulic hand pump can be mounted on either side of the tool for right or left hand operation
- Supplied with Victaulic® tool carry bag for accessory storage
- Power Requirements: Compatible with multiple power drive units: Ridgid™ 300, Ridgid™ 700 and REMS Amigo 2
- Weight: 165 lbs. | 75 kg

## Field Fabrication Roll Grooving Tools

### VE272SFS

[Download publication 24.01](#) for complete information

- Roll grooves  $\frac{3}{4}$ – $12"$  | DN20–DN300 pipe
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- Hand pump operation with a unique pivot arm design reduces handle effort
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Power Requirements: Ridgid™ 300 Power Drive
- Weight: 184 lbs. | 84 kg

## Field Fabrication Roll Grooving Tools

VE270FSD/VE271FSD

[Download publication 24.01 for complete information](#)

- Roll grooves  $\frac{3}{4}$ –12" | DN20–DN300 pipe
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- Completely self-contained unit with integral gear motor, safety guards, safety foot switch and power cord/plug
- Equipped with a unique pivot arm design, making roll changing quick and easy without removing shafts
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Power Requirements:  
VE270FSD is provided with 110 volt, 15 amp power;  
VE271FSD is provided with 220 volt, 6 amp power
- Weight: 340 lbs. | 154 kg

## Field Fabrication Roll Grooving Tools

VE416FS

[Download publication 24.01 for complete information](#)

- Roll grooves 2–16" | DN50–DN400 pipe
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- VE416FS is designed for field grooving of OGS pipe and should not be used for continuous field production grooving; For field production grooving capabilities, use a VE450FSD tool, see pg. 119
- Equipped with a pipe stabilizer for 6–16" | DN150–DN400 pipe sizes to control pipe sway
- Groove depth adjuster allows for easy adjustment for initial groove diameter
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Power Requirements: Ridgid™ 300 Power Drive
- Weight: 240 lbs. | 109 kg

## Field Fabrication Roll Grooving Tools

- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- The VE450FSD is designed for field production grooving and not continuous fabrication shop production grooving
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process, and quickly change upper roll design
- Lifting point to move the tool using a crane
- Frame can accept most forklifts
- Onboard storage for tool accessories
- Power Requirements: Self-contained unit with two 220 volt, single phase 50/60 hertz, 20 amp integral gear motors to handle heavier loads, safety foot switch and power cord/plug
- Weight: 825 lbs. | 374 kg

## Plant/Shop Fabrication Roll Grooving Tools

**VE268**

[Download publication 24.01 for complete information](#)

- Roll grooves  $\frac{3}{4}$ –12" | DN20–DN300 pipe
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Equipped with a unique pivot arm design, making roll changes quick and easy, without removing shafts
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- Power Requirements: 220/440 volt, 3-phase, 60 hertz standard; the tool can also be supplied in various voltages, contact Victaulic for details
- 3-phase requires tool power to be hard wired by a local certified electrician
- Weight: 735 lbs. | 333 kg

## Plant/Shop Fabrication Roll Grooving Tools

**VE414MC**

[Download publication 24.01 for complete information](#)

- Roll grooves 2–16" | DN50–DN400 pipe
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe; K, L, M and DWV copper tube (size dependent)
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Roll changes are quick and easy, without removing shafts
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- Power Requirements: 220/440 volt, 3-phase, 60 hertz standard; the tool can also be supplied in various voltages, contact Victaulic for details
- 3-phase requires tool power to be hard wired by a local certified electrician
- Weight: 735 lbs. | 333 kg

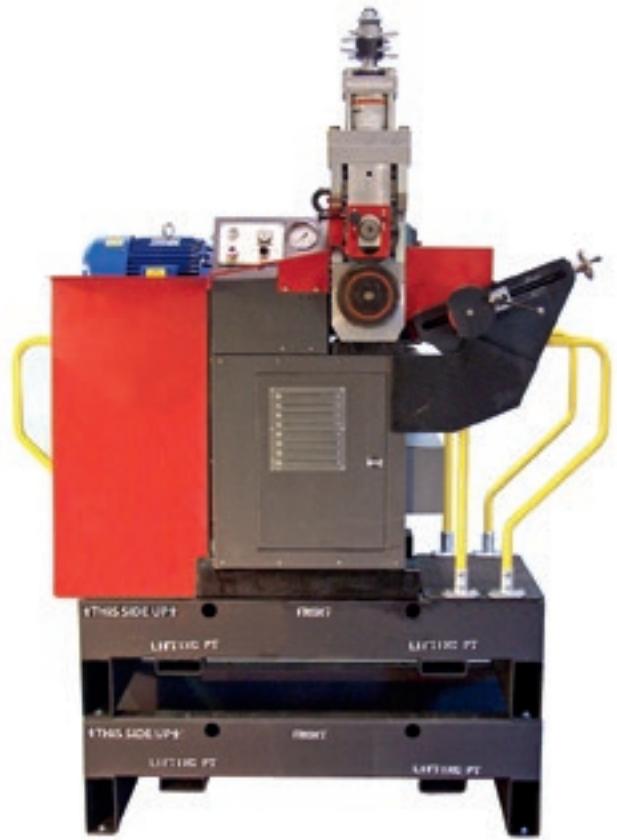

## Plant/Shop Fabrication Roll Grooving Tools

**VE460**

[Download publication 24.01](#) for complete information

- Roll grooves 4–24" | DN100–DN600 pipe with Original Groove System (OGS)
- For grooving of Schedule 5, 10, 40 and 80 steel; stainless steel; aluminum and PVC pipe (size dependent)
- Roll grooves 14–60" | DN350–DN1500 pipe with Advanced Groove System (AGS)
- For grooving of .250–.500 wall carbon steel; Schedule 5S and 10S stainless steel (size dependent)
- The fully-motorized, semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- Support bases are required to groove pipe sizes 26" | DN650 and larger. Each support base is 12" | 305 mm in height and corresponds with a range of allowable pipe sizes it can groove
- Power Requirements: 220/440 volt, 3-phase, 60 hertz standard; the tool can also be supplied in various voltages, contact Victaulic for details
- 3-phase requires tool power to be hard wired by a local certified electrician
- Weight: 1500 lbs. | 680 kg

## Plant/Shop Fabrication Roll Grooving Tools

**VE872**

[Download publication 24.01 for complete information](#)

- Roll grooves 8–78" | DN200–DN1950 pipe
- Wall thickness capability varies on size; Reference publication 24.01 for more details
- The semi-automatic, electrohydraulic tool comes complete with safety guards and safety foot switch
- Support bases are required to groove 30" | DN750 and larger pipe sizes; each support base is 16" | 406 mm in height and corresponds with a range of allowable pipe sizes it can groove
- Power Requirements: 220/440 volt, 3-phase, 60 hertz standard; the tool can also be supplied in various voltages, contact Victaulic for details
- 3-phase requires tool power to be hard wired by a local certified electrician
- Weight: 1900 lbs. | 862 kg

## Plant/Shop Fabrication Roll Grooving Tools

**RG5200i**

[Download publication 24.05 for complete information](#)

- Fully-automated, hydraulic shop tool is shipped fully assembled with proximity scanner, control stand and rolls for standard grooving (4–24" | DN100–DN600) Schedule 10 – 40 pipe
- Enhanced tracking rolls help to keep the pipe on the tool during the roll grooving process
- Tool ships with 4–12" | DN100–DN300 Original Groove System Groove Rolls and 14–24" | DN350–DN600 AGS Groove Rolls
- Drive Requirements: Self-contained
- Power Requirements: 208/240 volt, 3 phase, 50/60 hertz standard; the tool can also be supplied for use with various global voltage connections, contact Victaulic for details
- 3-phase requires tool power to be hard wired by a local certified electrician
- Weight: 1300 lbs. | 590 kg

## Field Fabrication Cut Grooving Tools

**VG28GD (GEAR DRIVE)**

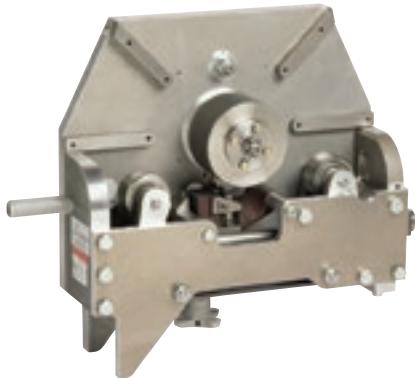

**VG28GD-ABR (ABRASION)**

**VDG26GD (DOUBLE GROOVE)**

**VG26GD-COR (CORROSION)**

[Download publication 24.01](#) for complete information

- Cut grooves 2–8" | DN50–DN200 pipe
- For grooving of Schedule 40 through 80 steel; stainless steel and aluminum pipe; Class 53 Min ductile iron (size dependent)
- VG28GD will produce a single *Victaulic* OGS cut groove for unlined piping systems
- VG28GD-ABR will produce a single *Victaulic* OGS cut groove that allows for lining of the pipe for abrasive services
- VDG26GD will produce a double *Victaulic* OGS cut groove for high pressure systems in conjunction with installing the 6" | DN150 Style 808 couplings
- VG26GD-COR will cut groove carbon steel pipe in preparation for being rubber lined and machined for abrasion and corrosion resistance
- The VG28GD, VG28GD-ABR VDG26GD, and VG26GD-COR are designed to be driven by the Power Mule II
- Drive Requirements: External drive, min. 1½ hp | 1.12 kw
- Drive Speed: 38 rpm max.
- Weight: 37 lbs. | 17 kg

## Field Fabrication Cut Grooving Tools

**VG824 (OGS)**

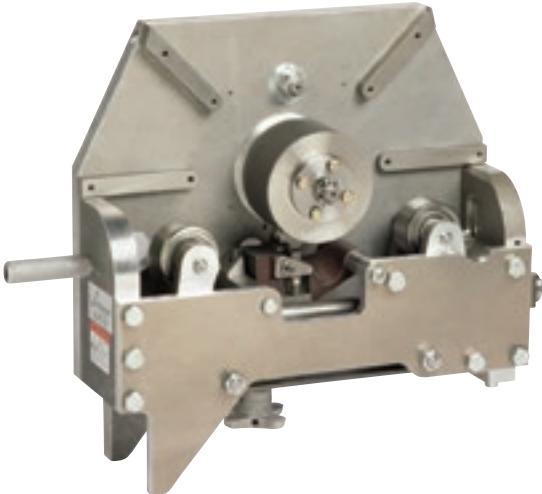

**VG824-ABR (ABRASION OGS)**

**VG824DG (DOUBLE GROOVE)**

**VG824-COR (CORROSION OGS)**

[Download publication 24.01 for complete information](#)

- Cut grooves 8–24" | DN200–DN600 pipe
- For grooving of Schedule 30 through 80 steel; stainless steel and aluminum pipe; Class 53 Min ductile iron (size dependent)
- VG824 will produce a single *Victaulic*® OGS cut groove for unlined piping systems
- VG824-ABR will produce a single *Victaulic* OGS cut groove that allows for lining of the pipe for abrasive services
- VG824DG will produce a double *Victaulic* OGS cut groove for high pressure piping systems in conjunction with installing 8–12" | DN200–DN300 Style 808 couplings
- VG824-COR will cut groove carbon steel pipe in preparation for being rubber lined and machined for abrasion and corrosion resistance
- The VG824, VG824DG, VG824-ABR and VG824-COR are designed to be driven by the Power Mule II
- Drive Requirements: External drive, min. 1½ hp | 1.12 kw
- Drive Speed: 38 rpm max.
- Weight: 82 lbs. | 37.2 kg

## Field Fabrication Cut Grooving Tools

### VG828 (AGS)

[Download publication 24.01](#) for complete information

- Cut grooves 14–24" | DN350–DN600 pipe
- For grooving of .500–.750 wall steel pipe
- VG828 will produce a single Victaulic® AGS cut groove
- The VG828 is designed to be driven by the Power Mule II
- Drive Requirements: External drive, min. 1½ hp | 1.12 kw
- Drive Speed: 38 rpm max.
- Weight: 82 lbs. | 37.2 kg

## Field Fabrication Cut Grooving Tools

### VG VIC-GROOVER

[Download publication 24.01](#) for complete information

- Cut grooves ¾–8" | DN20–DN200 pipe
- For grooving of Schedule 40 through 80 steel; stainless steel; aluminum and PVC pipe; Class 53 Min ductile iron (size dependent)
- Designed for manual or power cut grooving
- Supplied with a ratchet handle for manual operation
- Drive Requirements: Manual or external drive, min. ½ hp | 0.37 kw
- External power drives must meet all local/regional safety requirements
- Drive Speed: 40 rpm max.
- Weight: 28 lbs. | 13 kg

## Field Fabrication Cut Grooving Tools

### VG412 ORBITAL MACHINING TOOL

[Download publication 24.01 for complete information](#)

- Cut grooves 4–12" | DN100–DN300 pipe
- For grooving of Schedule 40 through 80 steel; Class 53 Min ductile iron
- Specifically designed for field closure pieces (not suitable for production grooving)
- External mounting and drive action is particularly suited to cement lined ductile iron pipe grooving
- Hinged frame design allows cutting at any point along the pipeline
- Drive Requirements: 120 volt, 11.5 amp
- Weight: 151 lbs. | 69 kg

## Cut Grooving Tools for Plastic Pipe

### CG1100

[Download publication 24.09 for complete information](#)

- Cut grooves 2–12" | DN50–DN250 pipe
- For grooving of Schedule 40 through 80 CPVC/PVC pipe
- Features the Victaulic® PGS-300 cut groove profile
- Power Requirements: 120 volt, 50/60 hertz, 7 amp
- Weight: 17 lbs. | 7.7 kg

## Cut Grooving Tools for Plastic Pipe

VPG824

[Download publication 24.01](#) for complete information

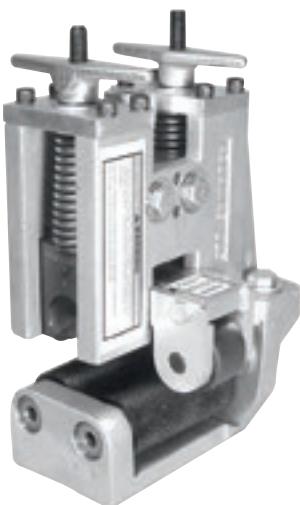

- Cut grooves 8–16" | DN200–DN400 pipe
- For grooving of Schedule 40 through 80 PVC pipe
- Features a high speed, router-type tool bit which cuts a radial groove, to full depth, in one manual rotation of the tool around the pipe
- Rotation Drive: Manual (clockwise)
- Power Requirements: 110 volt, single phase, 60 hertz, 7 amp
- Weight: 47 lbs. | 21 kg

## Refuse-to-Fuse™ Field Fabrication Cut Grooving Tool for HDPE Pipe

CG3100, CG3300, CG3500 (HDPE)

[Download publication 24.06](#) for complete information

- Cut grooves 8–36" IPS and 250–900 mm ISO HDPE pipe
- For grooving of SDR 7–21 pipe
- The tool mounts on the exterior pipe wall and cuts and grooves the end of the pipe in a single operation
- The CG3100 and CG3300 tools connect directly to a 120 volt, 50/60 hertz, 20 amp power source (An optional 220 volt, single phase, 50/60 hertz model is also available)
- The CG3500 tool connects directly to a 220 volt, single phase, 50/60 hertz, 20 amp power source
- Weight: CG3100: 430 lbs. | 195 kg, CG3300: 580 lbs. | 263 kg, CG3500: 715 lbs. | 324 kg

## Aquamine™ Grooving Tool

APG

[Download publication 24.01 for complete information](#)

- Prepares 4–12" | DN100–DN300 Aquamine pipe
- Manually operated tool used for producing a cut spline groove and beveled end on Aquamine PVC pipe
- Orbital tool which is rotated around a stationary, secured pipe
- May be operated on pipe held in a pipe vise or on supported in-place piping that is depressurized and drained
- Weight: 13 lbs. | 5.9 kg

## Hole Cutting Tools

HCT904

[Download publication 24.01 for complete information](#)

- One-piece hole cutting tool designed to cut holes up to 2¾" | 70 mm in carbon and stainless steel pipe; for pipe sizes up to 8" | DN200
- Allows use of Mechanical-T, Vic-Let, and Vic-O-Well outlets
- Power Requirements: 220 volt, single phase, 60 hertz, 10 amp
- Weight: 23 lbs. | 10 kg
- Regional availability, contact [Victaulic](#) for details

## Hole Cutting Tools

### HCT908

[Download publication 24.01](#) for complete information

- One-piece hole cutting tool designed to cut holes up to 2 3/4" | 70 mm in carbon and stainless steel pipe; for pipe sizes up to 8" | DN200
- Allows use of *Mechanical-T*, *Vic-Let*, and *Vic-O-Well* outlets
- Power Requirements: 110 volt, single phase, 60 hertz, 7 amp
- Weight: 23 lbs. | 10 kg

## Hole Cutting Tools

### VHCT900

[Download publication 24.01](#) for complete information

- Three-piece hole cutting tool designed to cut holes up to 4 1/2" | 120 mm in diameter for *Mechanical-T*, *Vic-Let*, and *Vic-O-Well* outlets
- Base unit clamps quickly onto the pipe in vertical, horizontal or overhead positions
- Available extended chain for 10–24" | DN250–DN600 pipe
- Power Requirements: Grounded 120 volt, single phase, 60 hertz, 10 amp electrical supply (220 volt, single phase, 60 hertz, 5 amp available on request)
- Weight: 36 lbs. | 16 kg

## Hole Cutting Tools

### VIC-TAP II

[Download publication 24.01 for complete information](#)

- Hole cutting tool including Style 931 Vic-Tap II Mechanical-T unit for tapping into steel pipe systems under pressure up to 500 psi | 3447 kPa | 34 bar
- Hole size 2 $\frac{3}{8}$ " | 60.5 mm
- Power Requirements: 115 volt, single phase, 60 hertz, 7.5 amp
- Weight:  
Drill guide base: 15 lbs. | 6.8 kg; Drill motor and feed assembly: 16 lbs. | 7.3 kg; Style 931 valve unit, 12 – 15 lbs. | 5.4 – 6.8 kg, depending upon size (4" | DN100, 5" | 141.3 mm, 6" | DN150 and 8" | DN200 available)
- Standard Capability: 4 – 8" | DN100 – DN200  
Run outlet only  $\times$  2 $\frac{1}{2}$ " | 73.0 mm (IPS) Outlet

## Style 926 Spigot Hole Cut Saw for HDPE Pipe

[Download publication 11.07 for complete information](#)

- Designed to cut 4" | DN100 and 6" | DN150 holes in HDPE pipe
- Allows use of Style 926 Mechanical-T Spigot Outlet

## Pipe Preparation Tools

## Pipe Cut-Off Tools

### VCT1 MANUAL

- [Download publication 24.01](#) for complete information
- Lightweight and portable pipe cut-off tool handles 4–24" | DN100–DN600 pipe, up to 0.5" | 12.7 mm thick
  - Worm gear drive crank handle provides smooth, manual travel, easy control and accurate cutting
  - Wall thickness: 0.065–0.500" | 1.65–12.7 mm (with tips supplied)
  - Tips: Acetylene – 1 ea. #00, #0, #1
  - Power Requirements: NA
  - Weight: 22 lbs. | 10 kg

## Pipe Cut-Off Tools

### VCT2 AUTOMATIC

- [Download publication 24.01](#) for complete information

- Rotation is powered by a small 120 VAC motor with SCR remote control
- Unique distributor design has stainless steel insert which extends tip life, eases cleaning and reduces backfire
- Wall thickness: 0.065–0.500" | 1.65–12.7 mm (with tips supplied)
- Tips: Acetylene – 1 ea. #00, #0, #1
- Motor rating: 15 W, 10,000 rpm
- Power requirements: 120 volt, single phase, 60 hertz, 15 amp
- Weight: 33 lbs. | 15 kg

## Vic-Press™ Tools

### PFT510

[Download publication 24.01 for complete information](#)

- Designed for securing Vic-Press Schedule 10S products onto Schedule 10S stainless steel pipe
- Tool package includes:
  - (1) PFT510 tool,
  - (2) 18V Lithium Ion batteries,
  - (1) battery charger,
  - (1) tool carrying case,
  - (1) jaw carrying case,
  - (1) each of jaws sized  $\frac{1}{2}$ " | DN15,  $\frac{3}{4}$ " | DN20, 1" | DN25,  $1\frac{1}{2}$ " | DN40, and 2" | DN50, and
  - (1) adapter jaw
- Not compatible with PFT505 and/or PFT509 tools/components
- Power Requirements: Battery pack 110 volt, 60 cycle, 6.5 amp (optional 220 volt)
- Weight: 21 lbs. | 9.5 kg (PFT510 with 1" | DN25 jaw)

## Tool Accessories

### POWER MULE II

[Download publication 24.01 for complete information](#)

- Ideal for driving individual Victaulic® cut grooving tools
- Heavy-duty, two wheeled unit drives Victaulic cut grooving tools at the speed/power necessary for accurate grooving
- Rotating head for horizontal and vertical applications
- Power Mule II equipped with forward-off-reverse control and integral safety foot switch
- Full load speed: 35 rpm
- Power Requirements: 115 volts, 15 amp, 50/60 cycle (220 volts optional)
- Weight: 190 lbs. | 86 kg

## Tool Accessories

### VAPS112 ADJUSTABLE PIPE STAND

[Download publication 24.01](#) for complete information

- Designed for supporting pipe to be roll grooved
- Turnstile design allows pipe to be spun around for grooving of both pipe ends without dismounting pipe from stand
- Forward/traverse movement
- Capacity:  $\frac{3}{4}$ –12" | DN20–DN300 pipe
- Load rating: 1,075 lbs. | 490 kg
- Vertical stroke: The legs adjust from  $8\frac{1}{2}$ " | 216 mm to achieve table height of 23" | 584 mm
- Minimum pipe height from floor: 23" | 584 mm on 12" | DN300 pipe and 21" | 533 mm on 1" | DN25 pipe
- Weight: 190 lbs. | 86 kg

## Tool Accessories

### VAPS224 ADJUSTABLE PIPE STAND

[Download publication 24.01](#) for complete information

- Designed specifically for supporting pipe to be roll grooved
- Self-standing, heavy-duty unit permits free pipe rotation and traversing on ball transfers
- Capacity: 2–24" | DN50–DN600 pipe
- Load rating: 1,800 lbs. | 816 kg
- Vertical stroke: 23" | 584 mm
- Minimum pipe height from floor 13" | 325 mm on 24" | DN600 pipe
- Maximum pipe height from floor 38" | 965 mm on 2" | DN50 pipe
- Weight: 260 lbs. | 118 kg

## Tool Accessories

### VAPS1672 ADJUSTABLE PIPE STAND

[Download publication 24.01 for complete information](#)

- Designed specifically for supporting pipe to be roll grooved
- Self-standing, heavy duty unit permits free pipe rotation and traversing on ball transfers
- Designed for use with VE460 grooving tools
- Capacity: 16 – 72" | DN400–DN1800 pipe
- Load rating: 10,000 lbs. | 4535 kg
- Vertical Stroke: 17" | 425 mm
- Minimum pipe height from floor 16" | 406 mm on 72" | DN1800 pipe
- Maximum pipe height from floor 28" | 711 mm on 16" | DN400 pipe
- Weight: 480 lbs. | 218 kg

## Tool Accessories

### VAPS270 ADJUSTABLE PIPE STAND

- Designed specifically for supporting pipe to be roll grooved
- Self-standing, heavy duty unit permits free pipe rotation and traversing on ball transfers
- Designed for use with VE270FSD, VE271FSD and VE272SFS grooving tools
- Capacity: ¾–12" | DN20–DN300 pipe
- Load rating: 660 lbs. | 300 kg
- Turnstile design allows grooving of both pipe ends without dismounting pipe from stand
- Minimum pipe height from floor: 37" | 930 mm
- Maximum pipe height from floor: 25" | 630 mm
- Weight: 44 lbs. | 20 kg
- Regional availability, contact [Victaulic](#) for details

## Tool Accessories

### GROOVE DIAMETER CABLES FOR COPPER TUBING

Go/No-Go pocket-sized groove diameter cables for taking circumferential measurements of copper tubing

- GDC-CTS cable should only be used to check roll-grooved tubing to CTS Standard Types K, L, M hard-drawn copper tubing per ASTM B-88 and DMV per ASTM B-306 specifications (2–8" | 54.0 – 206.4 mm tubing sizes)
- GDC-EC cable should only be used to check roll-grooved tubing to European Standard EN 1057 R250 (Half-Hard) specifications (54 – 159 mm tubing sizes).
- GDC-AC cable should only be used to check roll-grooved tubing to Australian Standard AS 1432 Types A, B and D copper tubing specifications (50 – 200 mm tubing sizes)

### GROOVE DIAMETER CABLE FOR VICTAULIC® STRENGTHIN™ 100 SYSTEM FOR THIN WALL STAINLESS STEEL

Go/No-Go pocket-sized groove diameter cables are available for taking circumferential measurements on stainless steel pipe in sizes 2 – 12" | DN50 – DN300

- GDC-STRENGTHIN100 cable should only be used to check roll grooved pipe conformance to *Victaulic StrengThin 100* groove diameter specifications
- To ensure proper grooving dimensions, always refer to the I-E497 *StrengThin 100* Installation instructions or to the latest groove specifications publications located on [victaulic.com](http://victaulic.com)

### GROOVE DIAMETER CABLE FOR VICTAULIC PGS-300 SYSTEM FOR CPVC/PVC PIPE

Go/No-Go pocket-sized groove diameter cables are available for taking circumferential measurements on CPVC/PVC pipe in sizes 2 – 12" | DN50 – DN300

- GDC-PGS-300 cable should only be used to check cut grooved pipe conformance to *Victaulic PGS-300* groove diameter specifications
- This cable is a quick reference guide and is not a replacement for a calibrated diameter measuring instrument. To ensure proper grooving dimensions, always refer to the relevant installation instructions or to the latest groove specifications publication located on [victaulic.com](http://victaulic.com).

## Tool Accessories

### PT100A, PT101 AND PT102A

[Download publication 24.01 for complete information](#)

- Go/No-Go pocket-sized steel tapes for taking circumferential measurements of pipe
- Go/No-Go side can be used to check cut or roll grooved pipe for conformance to Victaulic® grooved pipe specifications
- Tapes notched on the lead end to allow proper overlap within the groove for more accurate measurement
- PT100A contains Go/No-Go markings for use with ¾–24" | DN20–DN600 pipe; tape marked with 0.01" | 0.25 mm increments on the opposite side
- PT101 contains Go/No-Go markings for use with DN20–DN600 pipe; tape marked with 0.25 mm increments on the opposite side
- PT102A contains Go/No-Go markings for use with Original Groove System sizes 8–12" | DN200–DN300 and Advanced Groove System sizes 14–72" | DN350–DN1800; tape marked in 0.02" | 0.5 mm increments on the opposite side

## Tool Accessories

### RG1200 GROOVE CONFIRMATION GAUGE SET

- Supplied with RG1200 roll grooving tool for easy groove confirmation
- Does not require tool to be removed from pipe to check the groove depth
- Used in conjunction with the PT100A or PT101A depending on the region

### HDPE GROOVE CONFIRMATION GAUGE SET

- Designed to check HDPE cut grooves to ensure they meet Victaulic specifications.
- Always refer to the I-900 HDPE Field Installation Handbook or Victaulic's HDPE Cut Groove Specifications ([publication 25.16](#)).

## Tool Accessories

### TOOL CARRY BAG

- Heavy duty tool carry bag for transporting roll grooving tools, grooving rolls, and other tool accessories
- Carry bag can accommodate up to 50 lbs. | 23 kg
- Weight: 4 lbs. | 2 kg

## System Safety Test Accessories

### NO. T-60 TEST CAP KIT

[Download publication 24.07 for complete information](#)

- Allows user another means to verify system is unpressurized and empty of test media before continuing work
- Packaged in stackable, heavy-duty rolling case
- Includes 2–8" | DN50–DN200 IPS test caps
- Individual test caps 2–12" | DN50–DN300 can be ordered separately

## Victaulic® Bolted Split-Sleeve Products (VBSP) Closure Tools

## Pipe Preparation Tools

## Fabrication Cell

**VAP131**

[Download publication 24.01](#) for complete information

- Turn-key, fab-shop solution
- Maximize productivity gains associated with Victaulic® grooved systems
- Includes hydraulic adjustable pipe stand and tracks, tool support, two adjustable positioner tables, an assembly table, as well as caster wheels and ball transfers

## Hydraulic Adjustable Pipe Stand for Fabrication Cell

**VAPS 131R**

[Download publication 24.01](#) for complete information

- Designed to support pipe for roll grooving
- Permits free pipe rotation and traversing on ball transfers
- Turnstile design allows pipe to be spun around for grooving of both pipe ends without dismounting from pipe stand
- Capacity: 4–24" | DN100–DN600 pipe; load rating: 2000 lbs. | 907 kg
- Vertical stroke: 30.5" | 775 mm
- Minimum pipe height from floor: Compatible with Victaulic production roll grooving tools
- Power Requirements: 230 volt, 6 amp, 50 hertz (120 volt, 12 amp, 60 hertz option available)
- Weight: 500 lbs. | 227 kg

## Hydraulic Positioner for Fabrication Cell

VAPS 131F

[Download publication 24.01 for complete information](#)

- Designed to support grooved pipe, valves, and fittings when used in conjunction with the VAPS 131T Assembly Table
- Foot control provided for hands-free operation
- Swivel caster wheel design for better mobility
- Capacity: 4–24" | DN100–DN600 pipe; load rating: 1200 lbs. | 544 kg with wheels installed, 2000 lbs. | 907 kg without wheels
- Vertical stroke: 29.25" | 743 mm
- Power Requirements: 230 volt, 6 amp, 50 hertz (120 volt, 12 amp, 60 hertz option available)
- Weight: 400 lbs. | 181 kg

## Assembly Table for Fabrication Cell

VAPS 131T

[Download publication 24.01 for complete information](#)

- Designed to support grooved pipe, valves, and fittings when used in conjunction with VAPS 131F Hydraulic Positioner
- Ball transfer assemblies can be positioned to accommodate pipe from 2–24" | DN50–DN600
- Capacity: 4–24" | DN100–DN600 pipe; load rating: 8000 lbs. | 3629 kg, ball transfers load rating 700 lbs. | 318 kg
- Vertical stroke: 29.25" | 743 mm
- Weight: 500 lbs. | 227 kg

## Gaskets/Seals/O-Rings

Victaulic offers a broad variety of synthetic rubber gaskets suitable for a wide range of applications. Victaulic® gaskets can accommodate high and low temperature extremes without loss of their chemical and physical properties. Refer to the *Victaulic Seal Selection Guide*, [publication 05.01](#) for a complete list.

For specific chemical and temperature compatibility, refer to the *Victaulic Gasket Chemical Services Guide — Long Report (GSG-100)* located on [victaulic.com](#).

## Gasket Seal Data

Victaulic offers a variety of synthetic elastomeric gaskets for a wide range of applications. To assure the maximum life for the service intended, proper gasket selection is essential.

Many factors can affect the performance and longevity of a gasket. These factors include, but are not limited to temperature, fluid, concentrations, a combination of fluids and duration of service. Temperatures outside of the design limits or use with incompatible fluids can reduce the performance capability of the gasket and service life.

Services listed are General Service Guidelines for each of the three associated product areas. It should be noted that there are services for which these gaskets, seals and o-ring are not compatible. Reference should always be made to the Gasket Chemical Services Guide for each Victaulic® gasket Grade for specific service guidelines and for a listing of services which are not compatible.

Gasket, seals and o-ring guidelines apply only to *Victaulic* gaskets, seals and o-ring. Guidelines for a particular service does not necessarily imply compatibility of the coupling housing, related fittings, or other components for the same service. *Victaulic* gaskets are marked with the gasket size, style, and associated compound for identification.

## Potable Water

Grade "E" EPDM, Grade "E" Vic-Plus™, Grade "EHP", Grade "EHP" Vic-Plus, Grade "E2" and Grade "EW" gaskets are UL Classified in accordance with ANSI/NSF 61 for cold +73°F | +23°C and hot +180°F | +82°C potable water service and ANSI/NSF 372.

Similarly, *Victaulic* Grade "M" halogenated butyl gasket material (which is used with *Victaulic* AWWA sized products) is UL Classified in accordance with ANSI/NSF 61 for cold +73°F | +23°C potable water systems and ANSI/NSF 372. See *Victaulic* [Publication 02.06](#) for more details.

The data provided is intended for use as an aid to qualified designers and specifiers when products are installed in accordance with the latest available *Victaulic* product line.

## Valve Seals

*Victaulic* Seal Selection Guide (05.01) does not include *Victaulic* seals for valves. Refer to the individual *Victaulic* valve publication for information on the seals available for each valve.

### CAUTION

- To ensure maximum product performance for the intended service, always specify the proper elastomer or seal material. Refer to the "Gasket Selection" and Chemical Services" sections located within this document.
- For specific chemical and temperature compatibility, always refer to the "Gasket Chemical Services Guide — Long Report" (GSG-100), which can be downloaded at [victaulic.com](http://victaulic.com).

Failure to select and specify the proper elastomer or seal material for the intended service may cause joint failure, resulting in property damage.

## Design Data

### Introduction

This Victaulic General Catalog has been written for the piping system installer, designer, specification writer and owner as a basic reference guide for data about Victaulic® mechanical piping methods. This catalog is organized to provide information in the context and form most readily usable. For easy identification of major sections of interest, see the condensed table of contents on pg. i, for a quick reference guide, see pg. 145. For more detailed information, [download Design Data 26.01](#).

### Important Information

*Victaulic* standard grooved pipe couplings are designed for use with pipe grooved to meet *Victaulic* groove specifications and *Victaulic* grooved end fittings, valves, and related grooved end components only. They are not intended for use with plain end pipe and/or fittings. *Victaulic* plain end couplings are designed for use only with plain end or beveled end steel pipe (unless otherwise indicated) and *Victaulic* plain end fittings. ***Victaulic* plain end couplings must not be used with grooved end or threaded end pipe and/or fittings. Nor are they intended for use with Advanced Groove System (AGS) components used on 14–72" | DN350–DN1800 pipe sizes.**

Pipe must be prepared to meet *Victaulic* specifications outlined for each specific product style. Performance data listed herein is based on proper pipe preparation. The proper gasket must be selected for the service intended. **It should be noted that there are various services for which *Victaulic* gaskets are not recommended. Reference should always be made to the latest *Victaulic* Seal Selection Guide ([download publication 05.01](#)) for specific gasket service recommendations and for a listing of services which are not recommended. Gaskets for *Victaulic* products always must be lubricated for proper assembly.**

Gasket lubricant must meet manufacturer's specifications. Thorough lubrication of the gasket exterior, including the lips and/or pipe ends and housing interiors, is essential to prevent gasket pinching. Lubrication assists proper gasket seating and alignment during installation.

*Victaulic* has a complete line of tools for preparing pipe to *Victaulic* specifications. Use of these tools is recommended in preparing pipe to receive *Victaulic* products. Always read and understand the Tool Operating Instructions supplied with every *Victaulic* tool prior to using any tools. All data contained herein, is subject to change without notice.

### Notice

The technical and performance data, weights, dimensions and specifications published in this catalog supersede all previously published data.

*Victaulic* maintains a policy of continual product improvement and, therefore, reserves the right to change product specifications, designs, and standard equipment without notice and without incurring obligation.

For the most up-to-date *Victaulic* product information, please visit [victaulic.com](#).

The material presented in this catalog is intended for piping design reference in utilization of *Victaulic* products for their intended application. It is not intended as a substitute for competent, professional assistance which is an obvious requisite to any specific application.

### Design

Reference should always be made to design information available at no charge on request from *Victaulic*. Good piping practices should always prevail. Specific pressures, temperatures, external or internal loads, performance standards and tolerances must never be exceeded. Many applications require recognition of special conditions, code requirements and use of safety factors. Qualified engineers must make these decisions.

While every effort has been made to ensure its accuracy, *Victaulic*, its subsidiaries and affiliated companies, make no express or implied warranty of any kind respecting the information contained in this catalog or the material referred to herein.

Anyone making use of the information or material contained herein does so at their own risk and assumes any and all liability resulting from such use.

### Installation

Reference should always be made to the specific *Victaulic* Field Installation Handbook or Manual for the product you are installing.

Handbooks and Manuals are included with each shipment of *Victaulic* products for complete installation and assembly data, and are available in PDF format on our website at [victaulic.com](#).

## Warranty

We warrant all products to be free from defects in materials and workmanship under normal conditions of use and service. Our obligation under this warranty is limited to repairing or replacing at our option at our factory any product which shall within one year after delivery to original buyer be returned with transportation charges prepaid, and which our examination shall show to our satisfaction to have been defective.

THIS WARRANTY IS MADE EXPRESSLY IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE BUYER'S SOLE AND EXCLUSIVE REMEDY SHALL BE FOR THE REPAIR OR REPLACEMENT OF DEFECTIVE PRODUCTS AS PROVIDED HEREIN. THE BUYER AGREES THAT NO OTHER REMEDY (INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR LOST PROFITS, LOST SALES, INJURY TO PERSON OR PROPERTY OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL LOSS) SHALL BE AVAILABLE TO HIM.

Victaulic neither assumes nor authorizes any person to assume for it any other liability in connection with the sale of such products.

**This warranty shall not apply to any product which has been subject to misuse, negligence or accident, which has been repaired or altered in any manner outside of a Victaulic factory or which has been used in a manner contrary to Victaulic instructions or recommendations. Victaulic shall not be responsible for design errors due to inaccurate or incomplete information supplied by Buyer or its representatives.**

Items purchased by Victaulic and resold will have the original equipment manufacturer's warranty extended to Victaulic customers.

## Regulatory Compliance

Victaulic piping system products are tested and certified for a wide range of applications. Victaulic engages with many certifying authorities, approval bodies, and standards organizations globally, and maintains product certifications and strict compliance to applicable codes, standards, and directives, relevant to specific industries and markets.

## PRODUCT CERTIFICATIONS:

### Fire Protection

ACTIVFIRE – ActivFire Register of Fire Protection Equipment (Australia)
AON – AON New Zealand
CCCF – China Certification Center for Fire Protection Products (China)
CFPSC – Chinese Fire Protection Safety Center (Taiwan)
CNBOP – Centrum Naukowo-Badawcze Ochrony Przeciwpozarowej (Poland)
CNPP – Centre National de Prévention et de Protection (France)
CSFM – California State Fire Marshall (USA)
CTPC – Consiliul Technic Permanent Pentru Constructii (Romania)
EMI – Építésügyi Minőséggellenőrző Innovációs (Hungary)
FESC – Fire Equipment and Safety Center of Japan
FDNY – Fire Department, City of New York (USA)
FM – FM Approvals (USA)
HDB – Housing Development Board (Singapore)
KFI – Korea Fire Institute
KFSD – Kuwait Fire Service Directorate
LPCB – Loss Prevention Certification Board (UK)
SBSC – Svensk Brand- & Säkerhetscertifiering AB (Sweden)
TFRI – Tianjin Fire Research Institute of Ministry of Public Security (China)
TSU – Technický a Zkušobný Ústav Piešťany, s.p. (Slovakia)
TZUS – Technický a Zkuševní Ústav Stavební Praha, s.p. (Czech Republic)
UAE CD – United Arab Emirates Civil Defense
UKRFIREINSERT – State Certification Center (Ukraine)
UL – Underwriter's Laboratories, LLC (USA)
ULC – Underwriter's Laboratories of Canada

VdS – Verband der Schadenverhütung GmbH (Germany)

VKF – Vereinigung Kantonaler Feuerversicherungen (Switzerland)

Zagrebinspekt (Croatia)

### Potable Water

ARPA – Agenzia Regionale per la Protezione dell'Ambiente (Italy)

Belgaqua – Belgische Federatie voor de Watersector (Belgium)

DVGW – Deutscher Verein des Gas- und Wasserfaches e.V. (Germany)

Eurofins – ACS : Attestation de Conformité Sanitaire (France)

HZJZ – Hrvatski zavod za javno zdravstvo (Croatia)

INSP – Institutul Național De Sănătate Publică (Romania)

KWWA – Korea Water and Wastewater Works Association

NSF – NSF International (USA)

ÖVGW – Österreichische Vereinigung für das Gas- und Wasserfach (Austria)

PZH – Państwowy Zakład Higieny (Poland)

RUVZPP – Regionálny úrad verejného zdravotníctva so sídlom v Poprad (Slovakia)

SAI Global – WaterMark (Australia)

SPAN – Suruhanjaya Perkhidmatan Air Negara (Malaysia)

SVGW – Schweizerischer Verein des Gas- und Wasserfaches (Switzerland)

UL – Underwriter's Laboratories, LLC – NSF 61/372 (USA)

WRAS – Water Regulations Advisory Scheme (UK)

ZUOVA – Zdravotní ústav se sídlem v Ostravě (Czech Republic)

### Maritime

ABS – American Bureau of Shipping

BV – Bureau Veritas (France)

CCG – Canadian Coast Guard (Canada)

CRS – Croatian Register of Shipping (Croatia)

CCS – China Classification Society (China)

DNV GL – Det Norske Veritas-Germanischer Lloyd (Norway)

KRS – Korean Register of Shipping (Korea)

LR – Lloyd's Register of Shipping (UK)

RINA – Registro Italiano Navale (Italy)

USCG – US Coast Guard (USA)

### HVAC

CSTB – Centre Scientifique et Technique du Bâtiment (France)

ITB – Instytut Techniki Budowlanej (Poland)

Sercons Europe BV (Russia)

### Plumbing

IAPMO – International Association of Plumbing & Mechanical Officials (USA)

NSF – NSF International (USA)

## COMPLIANCE:

### Codes and Standards Compliance

ANSI – American National Standards Institute

API – American Petroleum Institute

APSAD – Assemblée Plénière Société Assurance Dommage (France)

AS/NZS – Standards Australia and Standards New Zealand (AU & NZ)

ASME – American Society of Mechanical Engineers (USA)

ASTM International (USA)

AWWA – American Water Works Association

CSA – CSA Group (Canada)

GOST R – Gosstandart (Russia)

IBC – International Building Code (USA)

ICC – International Code Council (USA)

IMC – International Mechanical Code (USA)

IPC – International Plumbing Code (USA)

IRC – International Residential Code (USA)

ISO – International Organization for Standardization (Global)

MSS – Manufacturer's Standardization Society (USA)

NACE – National Association of Corrosion Engineers (USA)

NFPA – National Fire Protection Association (USA)

UPC – Uniform Plumbing Code (USA)

WSAA – Water Services Association of Australia

### Pressure Equipment Safety

(2014/68/EU) PED – Pressure Equipment Directive (Europe)

CSA B51 – "Boiler, Pressure Vessel, and Pressure Piping Code" (Canada)

CRN – Canadian Registration Numbers per CSA B51

CUTR 032/2013 – Customs Union Technical Regulation "On Safety of Pressurized Equipment" (EAC)

### Chemical Safety / Recycling

BVB – Byggvarubedömningen Service AB (Sweden)

(EC/1907/2006) REACH – Registration, Evaluation, Authorization, and Restriction of Chemicals (Europe)

(2011/65/EU) RoHS2 – Restriction of Hazardous Substances Directive (Europe)

(2012/19/EU) WEEE – Waste Electrical and Electronic Equipment Directive (Europe)

SundaHus – SundaHus i Linköping (Sweden)

### Building Services

(EU/305/2011) CPR – Construction Products Regulation (Europe)

NBC – National Building Code (Canada)

### Explosive Environments

(2014/34/EU) ATEX – Equipment and protective systems for potentially explosive atmospheres (Europe)

### Seismic

OSHPD – Office of Statewide Health Planning and Development (USA)

PSB – TÜV SÜD PSB (Singapore)

### Tools and Machinery Safety

(2006/42/EC) MD – Machinery Directive (Europe)

(2014/35/EU) LVD – Low Voltage Directive (Europe)

(2014/30/EU) EMC – Electromagnetic Compatibility Directive (Europe)
